This Return will shew a slight difference in the Numbers (Totals) from other Returns, especially among the servants, about 18 Servants being shewn in this report extra from any other; this is accounted for by the servants at Port Mouat being included as remarked opposite their names.

PORT BLAIR,
The 1st May, 1867.

J. H. FRASER, CAPTAIN,
Assistant Superintendent.

I.

No. 87, dated 22nd May, 1867.

From—LIEUT. W. G. CUMMING, R. E., *Executive Engineer, Port Blair,*
To—*Superintendent, Port Blair.*

I have the honor to acknowledge the receipt of your letter No. 33 E. E, of the 20th May, together with copies of letters as per margin all with reference to the construction of Commissariat godowns on Ross Island. With reference to the 2nd and 3rd paras. of your letter under reply, I have the honor to state that I have made arrangements for the construction of two corrugated iron grain godowns for the Commissariat Department; the site for the first godown is now almost ready, it will therefore be put in hand without delay. The site for the second, however, will necessitate the removal of a large quantity of heavy materials which are in the Public Works Department yard, and as the supply to labor granted for the Public Works Department on Ross Island has now fallen very considerably lower than what it was a few months ago, I find it somewhat difficult to discharge the ship *Clyde* with rapidity, and at the same time to carry on the works which are now in hand. Immediately on the discharging being completed, I will commence the preparation of this site also.

No. 581 from Secy. to the C. C., B. B, to the Superintendent P. B. and Lieutenant Laughton's demi-official, dated 14th May 1867, with a rough sketch of the ground.

I quite coincide with Major Davies and Lieutenant Laughton's views as to the advisability of the Public Works yard being handed over to the Commissariat Department for sites for its proposed extension, and although this arrangement will somewhat inconvenience me, still it is better for the interests of Government that it should be so.

With regard to the concluding para of your letter, I beg to state that I have only a small body of trained convicts who understand the construction of corrugated iron buildings, and as four of these sheds are sanctioned in the year's Budget to be constructed in the Settlement, I do not think I could undertake to commence more than two of the extra new sheds asked for by Lieutenant Laughton, and this not until the year is somewhat more advanced. I will, however, do my utmost to push on any godowns that may hereafter be sanctioned for the Commissariat Department, as I am of opinion that they are much required.

No. 94, dated 8th May, 1867.

From—LIEUT. ARTHUR F. LAUGHTON, *Sub-Assistant Commissary General,*
To—*Secretary to the Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 528, dated 7th May on the subject of the system of issue in vogue here.

2. The only articles for which money is paid into the Treasury, are those issued to Free residents, on payment, and also to convict bunniahs. Articles issued to the Marine Department and to Hospitals are not paid for, nor do I see any necessity for payment being made. A considerable number of the Indents, on which I make issues, are debitable to "Miscellaneous Contingent." I am not able to say whether money is available from any sources for the adjustment of the value of any of these articles. Of from 250 to 300 Indents complied with monthly, about half are debitable to "Sale of Stock," that is, money value is recovered on them; and the other half to Miscellaneous Contingent, "Marine" and "Medical," on which no payment is made.

3. I make issues to the Department Public Works, as they require them, receiving one Indent at the end of the month for the whole, the value of which is paid into the Treasury by the Executive Engineer.

4. I do not think my receipts nearly balance the cost of my stores, exclusive of freight as the articles for which payment is not made, as above stated, comprise nearly half of my issues. Further, many of those articles for which payment is made, are sold at less than cost price, there being a fixed low rate for all the principal articles of food, calculated at what a convict is supposed to be able to pay for them out of his subsistence.

5. You will see, therefore, that it will be impossible for me to draw up a statement of the kind you wish, on which any reliance as to accuracy could be placed.

6. The articles you allude to were issued as follows:—

Candles to Hospitals and Church.

Cheroots, Currents, and Pickles were supplied for a dinner given by the Superintendent on Christmas day to the Christian prisoners. The Razors and Soap were issued to Hospitals.

7. The object for which articles are issued is not entered in the Indents. It would be well to have it done.

8. I enclose a form of Indent, slightly different to the one you sent, which will, I think, answer the purpose equally well, and will be a little simpler; but, at the same time, I would suggest that "Sale of Stock" Indents be continued in the present form, as the information to be given in the several columns of the new form is not needed in the case of purchase of stores by private individuals.

Voucher No. 32.

Proceedings of a Committee of Survey assembled by request of the Superintendent, Port Blair, for the purpose of inspecting and reporting on certain Commissariat stores laid before it by Sub-Assistant Commissary General.

PRESIDENT:

CAPTAIN R. N. SURPLICE, *H. M.'s 2-24th Regiment.*

MEMBERS:

LIEUT. F. H. MATHIAS, *Sappers and Miners.* | LIEUT. W. T. MUCH, *H. M.'s 2-24th Regiment.*

The Committee having met pursuant to order, proceeded to examine the undermentioned articles, and after an attentive examination have subjoined the following remarks:—

Names of Stores.	Serviceable.	Repairable.	Unserviceable.	Remarks by the Commissariat Officer.	Opinion of the Committee.
Ghoor ... . lbs.	7,773	....	.....	This Ghoor has leaked out of the casks in consequence of its being in so liquid a state, and of the casks not having been coopered up sufficiently tight. It is wastage on lbs. 1,34,843, the consignment of 3 ships, viz, "King Arthur," "Derbyshire," and "Marchioness of Londonderry;" the casks are produced for the inspection of the Committee.	This Ghoor has leaked out of the casks on account of its being in so liquid a state, and the barrels being badly coopered.
Choorah ... . "	545	....	.....	This Choorah has been found deficient from bags, when landed and brought into store. It is supposed to have been pilferred by the coolies in the boats and on shore. This deficiency is from consignments of lbs. 35,500 per "Derbyshire" and "Londonderry."	That this deficiency is caused by the coolies having pilferred the grain from the bags when bringing the same from the ship to the shore.
Potatoes .. .. .. "	292	....	.....	These Potatoes and Onions were found deficient on being landed and some of the baskets containing them were very much broken. I have addressed the Commander of the "Marchioness of Londonderry" on the subject and hand in his reply, in which he states that the baskets were broken on being put on board, and that he brought it to the notice of the Commissariat subordinate who was superintending their shipment. The baskets remained on board a flat off shore in the harbour for a night before they could be landed, and I have strong suspicions they have been tampered with by the convict crew. I have stated my suspicions on the loss of these and other articles to the Inspector of Police, but he has not been able to apprehend any one. This loss has been on a consignment of lbs 3,000 of Potatoes and lbs. 16,700 of Onions received by the "Marchioness of Londonderry."	That these Potatoes and Onions were put on board ship at Calcutta in very bad baskets, many of which it appears were actually broken. Also before landing these Potatoes and Onions they had to be left in a flat one whole night without any guard, except some convicts who were working the boat. Also that some loss may have been caused through dryage; the whole loss is caused through pilfering, bad package, and dryage.
Onions .. .. "	1,740				
Biscuits .. .. .. "	....	....	591	These Biscuits have been some time in store and have become weavil eaten and unfit for issue. When once they commence to be weavil eaten, consumers will not receive them—hence they lie on hand and become unfit for issue.	All weavil eaten and unfit for issue.

					lbs.	oz.	drs.		
Onions	..	..	..	,,	....	....	101	12	0	These articles are unexpended provisions received from the "Londonderry" and are rotten and unfit for issue.	All rotten and unfit for issue.
Ginger, Green	..	..	..	,,	....	....	101	12	0		
Garlic	..	..	..	,,	....	....	101	12	0		
Chillies	...	...	...	,,	....	....	101	12	0		
Turmeric	..	..	..	,,	....	....	101	12	0		
Soap, Country	..	..	..	,,	55	....	.....			This Soap was found deficient from a cask when it was opened for issue. The deficiency has arisen, it is supposed, from excessive dryage. The cask was received per "King Arthur" and should have contained lbs. 335.	That this cask of soap could not have originally contained as many pounds as stated, namely, 335, as on opening it, it was found to be quite full and in good order. A portion of the deficiency may have occurred through dryage, but not this amount.
Dhoties ...	...	...	...	No.	61	....	.....			These were found deficient from a bale landed from the "Derbyshire;" the Sergeant who saw the bales put into the boat states that one of them had a hole in the corner as though it had been torn by a nail, but that it had no appearance of having been tampered with. On being landed, however, it was inspected and a deficiency found in it of sixty-one Dhoties.	That one bale was torn before it left the ship, but there was no appearance of its having been tampered with. Commissariat Sergeant Whitby who was present when these Dhoties were being put into the boat from the vessel states he noticed the hole at the time, but that he is convinced that it had not been tampered with up to the time he saw it in the boat. That if so large a number of 61 Dhoties had been taken out, he would have seen it at once. The Committee are of opinion that the missing Dhoties were taken from the bale by the convict crew of the boat while bringing the bales to the wharf, they being tempted by the opportunity when they saw the hole in the bale.
Dholl ...	...	...	...	lbs.	....	....	40,000			This Dholl has been nearly two years in store and is objected to by the Bunniahs. It is recommended that it be issued to cattle in lieu of grain, the cost of each being about the same.	That the Dholl shown to the Committee is too old and dry for issue as rations to the Bunniahs, but that it would be suitable as food for cattle in lieu of grain.
Ale ...	...	...	...	Gals.	52	....	.....			This has leaked out of a hogshead just landed from the "Derbyshire." It appears that the hogshead was found nearly empty when taken from the hold where it had been at the bottom of the cargo.	That this loss has occurred through leakage, the barrel shown to the Committee still bearing signs of leakage.
Axe, China, No. 1	...	...	...		....	....	.....			The kegs in which these were packed were landed broken, and one axe and one wedge were found deficient. It is supposed that they dropped out.	Commissariat Sergeant Whitby states he saw all these kegs sent over the ship's side to the boat for landing; that all were properly coopered and sound, thus the two kegs shewn to the Committee must have been damaged on board the lighter, or when being hauled up to the jetty by the crane, and the missing axe and wedge must have then dropped out and been lost as each keg was emptied and counted directly they were landed on the pier or jetty.
Wedges, Iron, No. 1 or lbs. 11¼	...	...			....	....	.....			Under the circumstances of the many instances of pilfering which have occurred during the landing of cargo, I am of opinion that it would be advisable to place a free policeman in charge of each boat on leaving ships in port, whose duty it would be to retain charge of the cargo until landed, and made over to a Court Clerk on shore.	The Committee fully concur in the suggestions of the Commissariat Officer in respect to having a Police Guard with each boat that leaves ships with cargo for store.

K.

Memo. by M. Green, Esq., *furnished at the request of* Major H. N. Davies, *Secretary to Chief Commr of British Burmah, in the matter of the proposed purchase of the premises erected on land granted to* Mr. M. Green *at Port Blair, Andaman Islands, by the Government of India.*

Mr. M. Green is a settler under Act No. 27 of the Legislative Council of India, dated September 1861, and he received a License from Colonel Haughton under the 15th Clause of that Act, and a grant of land dated 9th May 1863, and another dated April 1863, from Colonel Tytler in consideration of his carrying on the business of a General Dealer at Port Blair.

Mr. Green cleared the land at his own expense, and erected from time to time no less than five buildings at a cost of about 30,000 Rupees, in accordance with the objects and wishes of Government, and supplied the Settlement Government Officials and others resident on the Island for the space of 7 years, unmolested and undisturbed.

Mr. Green also sunk two wells on the land granted.

The dimensions of the buildings are as follows:—

1st.—A dwelling house 80 by 40 feet, of teak wood principally.

2nd.—Sale rooms 36 by 48 feet also of teak wood principally; both excellently adapted for offices, dwelling houses, school rooms, or store rooms.

3rd.—Out-houses 80 by 12 feet, the buildings are situated on the beach, on land measuring about 180 feet square, and one-half of this land granted to Mr. Green was raised three feet from the original level at Mr. Green's expense, thus reclaiming 180 feet square of land being a very valuable site for the purposes of business.

Mr. Green has recently received an offer from Major H. N. Davies which is less by some thousands of Rupees than the amount expended by Mr. Green on the site, independently of the value of the land, so that the sale thereof would involve the cessation of the business carried on, thus causing a loss of income and outlay which must necessarily form important items in the negotiation of the sale of the estate.

The amount hitherto offered is entirely inadequate as an estimate value both of the property and business of Mr. Green, apart from any consideration of compensation for 7 years' standing or good-will, and Mr. Green's indisputable rights under the two grants before mentioned.

Mr. Green adheres to his first proposition that, if the Government wishes to conclude the purchase of the property, rights and advantages herein detailed, the sum of Rupees 50,000, is the lowest sum which would at all represent a just return of his capital and property therein, and would at the same time be a very advantageous bargain to the purchasers.

It must also be considered that a large amount of stock on the premises would have to be sold at an enormous sacrifice, as also stock invoiced and purchased on its way here, not yet arrived at Port Blair, also the value of the fittings must be taken into account, and the outlay in sinking the two wells.

Mr. Green would also remind Major H. N. Davies that the interest on the money expended for the buildings, &c., &c., would itself make a return at the small interest of ten per cent. for 5 years of no less a sum than Rs. 15,000, and furthermore the heavy losses I have been subject to now over two years by the repeated disappointment arising from the non-receipt of goods owing to my having been deprived of the rights and privilege of free freight, hitherto allowed me by Government, although numberless vessels chartered by Government have arrived from Calcutta.

From—Major H. Nelson Davies, *Secy. to the Chief Commissioner, British Burmah,*
To—M. Green, Esq., *Port Blair.*

I have received your Memo. dated 11th instant. Your demands are so exorbitant that there is no use in my discussing them. The proper way to deal with the question

will be for a notice to be issued in the Public Works Department, and a valuation made in accordance with the Act, which provides for such cases.

No. 205, dated 24th January, 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent of Port Blair.*

To—*The Officiating Secretary to the Chief Commissioner, British Burmah.*

No. 17, dated 22nd Jan. 1867.

I have the honor to forward enclosed copy of a letter to my address, as per margin from the Assistant Superintendent of Port Blair, in which that Officer brings to notice a Mr. Green, a person who was permitted in April 1860, by Colonel Haughton, the Superintendent of this Settlement, to open a shop at this place, on the conditions stated in copy of his letter to Mr. Green attached, (No. 794, dated 20th April 1860).

2. From Captain Fraser's letter, it appears that Mr. Green instead of confining himself to the business simply as a tradesman in his shop, has undertaken employment as an Agent in the sale of the cargo and hull of the Barque *Pomona*, recently wrecked here, and notwithstanding that the Executive Engineer made a protest of the sale of certain timber comprised in that cargo, and producing letters on the subject, from which it appeared that such portion of the cargo had been disposed of to Government, and notwithstanding that orders were issued from the Court of the Assistant Superintendent directing Mr. Green to postpone such sale, it appears he took upon himself to sell that wreck in the face of that Court's order to the contrary.

3. It would further appear that Mr. Green has no license as an Auctioneer; he styles himself a Commission Agent in the sign-board of his shop.

4. In connection with this complaint from Captain Fraser, I have also to enclose copies of correspondence between Mr. Green and the Superintendent of Police, in which it will be observed (Mr. Green's letter No. 11, dated 5th January) that he has charged that gentleman to me with writing him an "*evasive*" letter; with the use of which terms Lieutenant Lowndes naturally feels indignant.

5. It is my duty also to have to state that I have received complaints from Officers of the Settlement of his having used familiar, and thereby insultive language towards them in their relative positions in his, Mr. Green's, Auction room at the time of sale of the wreck of the *Pomona*.

6. It is to be regretted that Mr. Green has so far forgotten himself and the terms under which he was permitted to establish himself in business in this place in the above particulars. Had Mr. Green been simply a lodger in this place, I should not have hesitated to have dealt with the above matter myself; but seeing that he has obtained grants of land in the Settlement in which he has erected buildings and established himself in business, I have deemed it advisable to refer the matter to the Chief Commissioner for orders; for Mr. Green's grants are for long periods, as will be seen in reference to copies thereof attached, and he has urged the circumstance of his outlay thereon as a plea for certain concessions to him in business regarding which I have already addressed you in my letter No. 203 B of 20th instant.

No. 17, dated 22nd January, 1867.

From—CAPTAIN THE HON'BLE J. H. FRASER, *Assistant Superintendent,*

To—*Superintendent, Port Blair.*

I have the honor to bring the following to your notice for such orders as you may consider necessary to issue on the subject.

On the 17th December 1866, Captain Dixon of the Barque *Pomona*, presented himself in my Court and stated that he wished to sell the wreck of the *Pomona* under instructions from his employers. As his authority he produced two letters, and after perusal, the Court observing no informality in the matter, offered no objection to the sanction solicited for the sale, which was fixed for the 22nd December 1866.

On the 20th December 1866, however, Lieutenant W. G. Cumming, R. E., Executive Engineer of Port Blair, intimated to me that he had a protest to make against the sale, and I appointed the next day, 21st December 1866, to hear it—giving notice to Captain Dixon that he would have to appear in my Court on that day.

On the 21st December 1866, the Court being open and all parties present, Lieutenant Cumming made his protest and read letters, shewing that sometime before any orders on the subject had been given to Captain Dixon by his employers, certain of the cargo had been disposed of to Government by the Underwriters, the wreck having, it was said, been abandoned to them by the owners. Mr. Green being in Court at the time, and Captain Dixon stating he was unwell, wished to appoint Mr. Green to act for him; this could not be allowed, Mr. Green having been named Auctioneer for the sale.

After hearing several arguments on both sides, the Court decided that the sale should be postponed for further enquiries to be made, and issued orders accordingly, giving a written order to Mr. Green to postpone the sale indefinitely. The sale was therefore postponed *sine die*; but since that Mr. Green, Merchant, at Port Blair, has taken upon himself to sell the wreck in the face of my order to the contrary.

As far as I can gather from a reference to your Office, and also from an application to Mr. Green to produce his License as an Auctioneer, copies of correspondence attached, he does not appear to be in possession of one; and I therefore request your instructions as to how I shall act in the matter, as he, Mr. Green, apparently does not acknowledge the authority of my Court.

No. 199, dated 9th January, 1867.

From—CAPTAIN THE HON'BLE J. H. FRASER, *Assistant Superintendent, Port Blair,*
To—MR. M. GREEN, *Merchant, Port Blair.*

The Superintendent having been given to understand from yourself that you are in possession of a License to act as an Auctioneer and Commission Agent in the Settlement of Port Blair, and that it was granted by one of Colonel Ford's predecessors, I am directed to request you to be good enough to file a copy of the same at your earliest convenience in my Office, which act you will no doubt perceive to be as desirable for your own interest, as for the placing this Office in possession of information on this subject.

No. 12, dated 10th January, 1867.

From—M. GREEN, ESQ., *Merchant Port Blair,*
To—CAPTAIN THE HON'BLE J. H. FRASER, *Assistant Superintendent, Port Blair.*

In reply to your letter No. 199 of yesterday's date, I respectfully beg to say that the Superintendent, Lieutenant-Colonel B. Ford, must, I fear, have misunderstood me.

No 11, dated 5th January, 1867.

From—MR. M. GREEN, *Agent,*
To—LIEUT.-COL. B. FORD, *Superintendent, Port Blair, & Commr. of Andaman Islands.*

Under instructions, I most respectfully beg to bring to your notice that I made an application* to the Superintendent of Police, for the services of two men on payment to keep guard over the appurtenances and some teak timber landed from the wrecked Barque *Pomona*, and in reply from the above mentioned gentleman received an evasive answer. Copy herewith enclosed.

* Copy forwarded enclosed.

I further respectfully beg to bring to your notice that, in my application no allusion whatever is made to the "wreck" and its "cargo"; having sold the "wreck" by public auction to Mr. R. Berrill, I consequently have no further control over it, but I simply allude to the appurtenances and teak timber landed on the beach at Phœnix Bay which I, as Captain Dixon's constituted Agent, have full power to take charge of and sell by public auction, after being duly advertized, to the best advantage for the benefit of all concerned.

No 8, dated 2nd January, 1867.

From—MR. M. GREEN, *Agent,*
To—LIEUTENANT J. LOWNDES, *Superintendent of Police, Port Blair.*

I beg to request you will be pleased to place at my disposal the services of two Policemen on payment for the same, for the purpose of keeping guard over the appurtenances, and available teak timber landed and stacked, as per survey report, on the beach from the said wrecked barque.

No. 4, dated 2nd January, 1867.

From—LIEUTENANT J. LOWNDES, *Superintendent of Police,*
To—MR. M. GREEN, *Ross Island.*

In reply to your letter No. 8 of this date, I have to inform you that I have written to the Assistant Superintendent, Port Blair, to know whether he wishes a guard placed over the wreck and cargo of the barque *Pomona*.

This barque at present forms the subject of enquiry in his Court, and as he has issued an injunction against any sale of the barque or "cargo," I cannot grant any guard without his sanction.

B.

Dated 16th January, 1867.

From—Mr. M. Green, *Agent, Port Blair,*

To—Lieut.-Colonel B. Ford, *Superintendent, Port Blair.*

I have to acknowledge the receipt of copy of a letter No. 220, dated 9th June last from the Secretary to the Chief Commissioner of British Burmah, and beg respectfully to inform you that a duplicate of this my statement, in reply, has been forwarded by me to the Chief Commissioner of British Burmah for his kind and liberal consideration.

2. In opening out this statement I beg most respectfully to state, for the information of the Chief Commissioner, that the first paragraph of the statement made to Major General Sir Robert Napier embraces all that I pray Government may sanction, *viz.*, that the Commissariat Department at the Settlement of Port Blair may be requested to confine itself to its legitimate duty, or in other words, simply that Government may be pleased with their usual unbounded liberality to withhold their competition from me, and under which heavy burden I have been silently suffering unknown to Government for some time.

3. It will no doubt be observed that some months have been allowed to elapse without replying to the letter above alluded to; this delay I trust the Chief Commissioner will pardon when I state for his information that it was for the sake of remaining in peace and quietness at the Settlement on the one hand, and reluctance on the other to state that my application had unfortunately been misconstrued, and moreover that I had not been consulted in any way as to the possibility of my being able to carry out that supposed contract which the Chief Commissioner has been led to believe I wished to undertake.

4. Prompted by the sincere, kind, liberal, and considerate observations made by the Chief Commissioner on my behalf, induced me to go to Rangoon, and to call upon him personally to explain the subject of the supposed contract, precisely the same as I did to you previous to my leaving this for Rangoon.

5. The Chief Commissioner then requested me to submit a statement of what I really did wish, and which would receive his kind consideration.

6. With reference to paragraph 2 of the letter in question, I beg to state for the information of the Chief Commissioner that it would be found most beneficial to Government for the Commissariat Department to confine itself to its own province, for then Government would not be required to indent and keep in store a very large quantity of articles (superfluities) which are now indented for and kept in store, not for the benefit of the Troops or prisoners, but for free residents and others who may arrive here which is very frequent—and choose to indent on the Commissariat for these superfluities, depriving me, as it were, of that right which was given to me by the sanction of Government as an inducement to settle at the Andamans now very nearly seven years ago.

7. With reference to para. 3, I observe the Chief Commissioner there clearly remarks that there are many points which are not noticed in the papers forwarded to him, and which it is necessary should be ascertained before further steps are taken in the matter. This in itself shewed at once to the Chief Commissioner that the principal person could not have been aware what had taken place in the matter; nor was I made aware of the affair until a copy of the Proceedings was forwarded to me for my information a day or two before the Mail closed, thereby leaving me no time to reply or state my objections thereto.

8. Encouraged by the liberal remark of the Chief Commissioner regarding sugar, in paragraph 4 of the letter above referred to, I respectfully beg to state for his information that, in the time of Colonel J. C. Haughton, I was enabled, by being furnished with free freight from Calcutta, to dispose of many tons of the above article of consumption at the same price as that at which the Commissariat Department are now selling it, *viz.*, six pounds per rupee, and this at my own risk. I may here mention that whenever I had a large stock of the above on hand, Colonel Haughton the then Superintendent stopped the sale or issue of Government sugar, keeping it as a reserve and permitting me to dispose of the stock I had on hand, so that there was never a scarcity in those days; nor was this the only article which I then had the privilege of disposing to the prisoners, but various others which, on reference to the records of the Superintendent's Office will show. Certainly there were not so many prisoners then as there are at present, nor were there so many vessels arriving at this Port then as now, whereby I may, with the assistance of Government, be in a better position to supply the Settlement.

9. In paragraph 5, the Chief Commissioner very properly asks who is to provide warehouse room for the storing of these articles, and from this it appears that the proceedings are all one-sided; for the principal and most important subject for consideration is warehouse room, and which was never thought of, nor I, the party chiefly concerned, who was of course expected to provide the same, consulted in this most important matter. The Chief Commissioner on his visit to Port Blair had seen the limited space of ground which I possessed

and that the Commissariat Department at this Settlement, with all its extensive godowns and sheds cannot still manage to keep the stores from being destroyed and requiring further accommodation—the want of which compels the Department to land the stores on the Beach. Such being the case, how could it be expected from me to undertake a contract which the Government themselves with all and every advantage, cannot carry it on without very great and heavy losses.

10. As regards free freight, times have much changed since I made my application although a large number of vessels arrive at Port Blair; but they are invariably loaded with Commissariat stores and for some cause or other unknown to me the Master Attendant at Calcutta will not give any freight, although repeated and pressing applications have been made to him from time to time, but of no avail. I have personally begged and explained my case, but no space could be found to be made available. This sore grievance under which I am silently crushed has been going on for some time past, and the explanation which I shall now lay before the Chief Commissioner of its probable cause I trust will shew him the fact that some silent hand has been working against me, at least so circumstances make it appear. For instance, at the present time there are two large sailing vessels of considerable tonnage of 11 and 13 hundred tons arrived last month from Calcutta; my Agents, Messrs. Gillanders, Arbuthnot & Co. could not obtain freight from the Marine Office for even one single package, although willing to pay by my instructions the market rate of freight, knowing that half a loaf is better than none at all.

11. It will be necessary to mention my desire to obtain free freight, if there was a shadow of a chance which, I am sorry to say, has been far from it. It was for the very purpose of competing with the Commissariat Department in trying as near as possible to dispose of such articles of merchandize that I had for sale, and which the Commissariat were simultaneously issuing to those who may avail themselves of the privilege not intended by Government for them. It often occurs that Government send their own vessels, and in chartering vessels only pay from Rs. 7, 8, or 10 per ton, whereas I am compelled to pay 20 and even 40 rupees per ton. This, therefore, falls heavy upon me, and in consequence am not in a position to offer my articles to the free and other residents so cheap as it would be otherwise, being entirely thrown out by the Commissariat Department, or Government, who, I regret to say, are too powerful a competitor for a person in my position—working to obtain a living, more especially in a Penal Settlement, retired from the world, where the choice of obtaining a few tons of freight is almost out of the question, and taking into consideration the very great difficulty in obtaining the same. I beg further to state the difficulties against which I have had to contend and still contending, I need not say, for I believe they are pretty well known to the Chief Commissioner have been and are great, as five, six and seven months out of the year have often elapsed before a single package has been received from Calcutta for sale, although my Agents have been exceedingly attentive and prompt at all times in getting my goods ready for despatch as they arrive from England. I have thus been compelled from time to time to travel to Calcutta, leaving my business at Port Blair for the purpose of bringing down some stores for sale, and by this step not being on the spot with the necessary stores on hand have been driven entirely, as it were, out of the market by the Commissariat Department, and moreover, my travelling expenses become great and in consequence the prices of my goods dearer than I have hitherto been able to dispose of them as I had engaged when first I was allowed to settle and that was at the Calcutta shop prices.

12. Emboldened by the broad, liberal, and kind view that the Chief Commissioner has taken of my case, I am resolved and determined to seek for justice at his hands, I ask for no favors for any thing to which I am not entitled to from Government, but I simply pray that the Government will, with their usual unbounded liberality extend to me their hand of justice by withdrawing their competition from me in this place.

13. As it may be quite probable that the Chief Commissioner may not be aware under what circumstances and inducements I settled at the Settlement of Port Blair, I respectfully beg to state for his information as follows.

14. In the early part of 1860 after I left Government employ, I made an application to the then Superintendent, Colonel J. C. Haughton, to open a shop at the Settlement for the sale of articles of every description, and which was granted under certain restrictions, and as an encouragement, free freight to extend my business was given me regularly and I was also accommodated with free quarters. The Superintendent having found me useful he was extremely desirous that I should supply a few good conducted prisoners to whom after service to the State, he had been pleased to allow them the privilege of becoming self-supporter shopkeepers to sell to their fellow prisoners generally such articles of clothing, &c., &c., which they needed, as also with the clear view of lightening the duties of the Commissariat or General Store Department.

15. To carry out the wishes and intention as also the views of the Superintendent and for me to keep up a goodly supply, increased tonnage of freight was given to me, so much as 15, 20, and 30 tons at a time, so that the prisoner shopkeepers depended entirely upon me for their supplies; but alas I regret to say such is not the case at present, nor has it been for sometime past, for the Native prisoner shopkeepers as well as the Commissariat Department strongly oppose me, which they can do with ease, as they are indiscriminately allowed to obtain goods of almost every description from all parts of India, and this I must say they do by some means with greater facility and success than myself. However, in continuation of my settling here I beg to state that after having carried on business successfully under the kind and just

patronage of Major Haughton for two long years to that gentleman's entire satisfaction, I was in May 1862, supplied with a grant of land which was given to me as an encouragement to continue at the Settlement, as also to place me on quite a firm footing and on an independent foundation in setting aside those restrictions upon which I entered the Settlement, and as for the security to reside and carry on the business in quite a general way granted me a license in accordance with Act XXVII of 1861.

16. According to a Clause in my grant of land I was forced to erect a building within a limited space of time, which I did. Lieutenant-Colonel Tytler then succeeded Major Haughton. In the early part of his administration, I finished the building as a dwelling and shop which cost me some hundreds of rupees. I lived in this building for two years, and in the mean time with the kind permission of the Superintendent, I for the space of a twelve month or more went daily into the jungle and cut down a number of posts with the aid of a few servants, as the Superintendent was well aware that the building which I occupied could not stand very long, and as an inducement to extend my trade was pleased to favor me with a similar grant of Land adjoining the one given to me by Major Haughton. As the major portion of this grant of land was very low, I strained every nerve to raise it, and which was accomplished with great difficulty. About the latter end of 1863, Major General Sir Robert Napier visited Port Blair, and while engaged in the affairs of the Settlement did not fail to inspect my store room and shop, as well as the two grants of land, and being recommended by the Superintendent and after questioning me into the state of my affairs, said that I deserved every encouragement and that if I was able and willing to undertake the supply of small stores to the Settlement I might forward a statement to him which should be submitted to the Council for consideration.

17. Encouraged with the hope of success and the fact of Major General Sir Robert Napier having remarked to the Superintendent, that by my supplying the market it would be in all probability most beneficial to Government, I immediately with the aid of a few hired servants erected a building 80 feet long and 40 feet broad, part of jungle wood and part of teak wood on the site of the second grant for a shop and store, and which I need not say has cost me many thousands of rupees. Owing to some unforeseen circumstances, I unfortunately was late in forwarding my statement to Calcutta. and by the time I arrived Major General Sir Robert Napier was busy with some other work, otherwise the request in my statement would have been finally decided upon.

18. My Agent at this time failed me by his neglect in not sending me stores regularly, so I was forced to enter into a law suit which occupied 18 months of my time in establishing my rights, but although I was so beset, I still kept Major General Sir Robert Napier's remarks in view, and erected another building of jungle wood and teak, 48 feet long by 36 feet broad, and in which I at present expose my articles for sale, reserving the lower portion of the larger building for storing my heavy goods.

19. I did not move again in the matter of my statement until 1866, when I applied to Lieutenant-Colonel B. Ford, as he was then going to Calcutta to favor me by resubmitting my statement before Council : whether it was done I know not, but am only aware that Lieutenant-Colonel Ford returned to the Settlement, wrote out a proceeding of which I was only aware when the above document referred to was sent to me for a reply.

19. Having given briefly as possible a statement of my career since my arrival at this Settlement, I will in conclusion beg respectfully to state for the information of the Chief Commissioner of British Burmah, that all my funds have been buried in buildings almost the whole of the time I have been in possession of the two grants, and encouraged by Government have established myself at Port Blair and cannot but look on it as my future home.

20. I also beg respectfully to state that with a little encouragement on the one side, and justice on the other, I shall be in a position in a better light to continue to benefit the Settlement, and at the same time relieving Government from indenting for such articles which are not absolutely required for the use of the Troops and prisoners.

21. I may here state for the information of the Chief Commissioner that I have made arrangements with my Agents in Calcutta to despatch all light goods *viâ* Rangoon, although they may cost upwards of 60 Rupees per ton. This step I trust will not only prove beneficial to the residents, but also act as a check to those prisoner shopkeepers who were established chiefly by me in keeping down the prices of articles.

22. In the event of the Chief Commissioner being pleased to take the same kind and liberal view of this my statement as shewn by the remarks in the letter already referred to, and request the Commissariat Department at Port Blair to omit indenting for all such articles as are not needed for the Troops and prisoners, my requirements will then be such and sufficient as hereafter to enable me often to charter a small vessel for the conveyance of my goods, and by which step avoid the frequent and repeated applications for free freight.

C.

No. 534, dated 15th February, 1860.

From—Colonel J. C. Haughton, *Superintendent, Port Blair,*

To—Mr. Green, *Clerk, Superintendent's Office.*

In reply to your letter of the 9th instant, I have to say that I should be prepared to strictly carry out the promise of increase of salary held out to you by my predecessor and confirmed by myself, however inconvenient it might be with reference to the Office arrangements to do so, if the conditions on which the promise was made were fulfilled. As

concerns myself, the condition was your ability to keep charge of and manage the Store Department. I have no reason to doubt your ability for the duty, but having been compelled to remove you from the Office in consequence of your having forfeited my confidence, I cannot look upon you as entitled to the increase of salary you seek, and must therefore adopt the alternative you leave me. Your resignation is therefore accepted from this date.

To save yourself all inconvenience hereafter, I request you will be particularly careful to make over to Mr. Madge every public document in your possession.

D.

No. 794, dated 20th April, 1860.

From—Colonel J. C. Haughton, *Superintendent, Port Blair,*

To—Mr. Green.

In reply to your letter of the 2nd instant, I beg to say that I have no objection to your opening a shop at this place on the understanding that you bind yourself at once to close it and remove from the Settlement, should the Superintendent for any cause deem it necessary to direct you to do so.

I will also afford you such aid as lays in my power on your arrival, furnishing you with tents or other means at my disposal for the shelter of your goods.

You are not permitted to import wine or spirituous liquors, other than Beer in quarts or pints, and the latter can only be sold with sanction for each sale.

All intoxicating drugs are prohibited alike for importation or sale, also arms.

Powder and shot in small quantity will be admitted. Special license for each sale will be required, and observance of the whole of the Indian Regulations on the subject of such articles will be exacted.

You will be if you choose to come here, subject to all existing Regulations and such as may from time to time be exacted.

E.

No. 793, dated 20th April, 1860.

From—Colonel J. C. Haughton, *Superintendent, Port Blair,*

To—*Superintendent of Marine, Calcutta.*

I request you will favor me by furnishing Mr. Green late Clerk, on this establishment with a passage for himself and family to this place, and also tonnage for 5 tons of goods.

F.

Extract from a Memo. dated January 1867, *from the Executive Commissariat Officer, Port Blair, to the address of the Superintendent of Port Blair.*

"Sugar was sold in the Commissariat at 6lbs per rupee, on the occasion when it ran short "and for a long time previous. The rate at which it was then sold by Mr. Green was, I believe, "2lbs per rupee."

EE.

Proceedings of the Superintendent of Port Blair on a copy of a Memo. submitted to him by Messrs. M. Green & Co., (stated to have been laid before his Honor Sir Robert Napier, K. C. B.,*) without date received about the beginning of January* 1866.

1. This document sets forth a statement in connection with a project then submitted by Messrs. Green & Co., for regularly supplying the Settlement of Port Blair with sundry articles and stores at present on supply in the Commissariat Department, and which Messrs. Green & Co., submit that they can put into the local market at lower charges than those obtaining in the above Department.

2. In connection with the above proposal, Messrs. Green & Co., submit an application on the subject of being supplied with a certain quantity of freight free, and of labor for which they undertake to pay.

3. The above documents have been submitted for the perusal of the Chief Commissioner, British Burmah, and by his request also to the Secretary to the Government of India, Home Department, to the Commissary General at Calcutta, and to the Sub-Assistant Commissary General at Port Blair.

4. The result of the above reference, and of enquiries regarding the same is as follows.

5. It is found from the books of the Superintendent's Office, that at the time when Messrs. Green & Co., had, as it stated, an ample stock in hand, that the strength of the convicts on the Settlement was as under :—

1st May 1860	...	...	...	2,091
1st ditto 1861	...	...	...	1,900

It is found also that at the time a large and varied supply of stores were here maintained by Government, for by the Returns of stores issued during those months, it appears that all the convicts had an abundance supplied them, consequently there was no demand on Messrs Green & Co.'s stores.

6. It is ascertained also that when Mr. M. Green of the above firm resigned the Government employment he held in this Settlement, he then having obtained permission to trade between Calcutta and this Settlement, obtained an allowance of free freight at the rate of 5 tons per trip of every Government vessel.

7. With these points in view, it will become necessary that Messrs. Green & Co. should state what supply of stores they would consider an ample stock, the Settlement having now 6,511 convicts on it, or 311 per cent. of 1860, 340 over that of 1861; and the convict population being likely to increase year by year, and whether such stock being considered ample by the authorities, they are prepared (under stipulations) to maintain the same.

8. It should be borne in mind also that with the increase of convicts, free residents will increase in number, and a margin should also be included for their supply, while a reserve stock would always have to be maintained to meet any emergency as the Local Commissariat is obliged to do.

9. Assuming then that Messrs. Green & Co. are prepared to show themselves in a position to maintain such stock of stores, the consideration of the articles that it would be advisable that they should hold always available for supply now follows.

10. The whole of the articles marked A with the exception of Sugar, 2nd sort, might perhaps be supplied by Messrs. Green & Co. on certain conditions. The demand for Sugar is great, and being one of the principal articles of convict consumption, it is not thought advisable to allow the supply of it or any other important item of food for the keeping up a sufficient stock of which the Commissariat Department is responsible, to go out of the hands of that Department.

11. Regarding minor articles of food, a stock of which however must be kept on hand, such as the several ingredients of curry stuff, garlic, tobacco, &c., which are required for daily issue to Troops, and for Troops and parties embarking, it is considered that the supply thereof should be left in Messrs. Green & Co.'s hands, only on condition that they bind themselves to furnish the same at rates as cheap or cheaper than that at which they could be obtained departmentally. Onions and potatoes might also be included if Messrs. Green & Co. would undertake the supply thereof.

Forms of schedule and agreement have been forwarded to the Sub-Assistant Commissary General, Port Blair, for reference.

12. Fixed annual rates for all articles should be determined on, and Messrs. Green & Co. should be required to enter into contract with the Commissariat Officer at Port Blair on the usual terms of the Department, showing the several articles he undertakes to supply, the annual rates of which should be entered in the schedule attached to the agreement. Supplies obtained by the Commissariat Department in this way, should, it is considered, be paid on monthly bills.

13. The Commissariat Officer at Port Blair should, as far as possible, from time to time, afford Messrs. Green & Co. every information as to probable requirements.

14. Reverting to the articles marked in Messrs. Green & Co.'s papers B, C, D, the question arises as to whether that firm is prepared to keep up a supply of tools, implements, hardware, marine, smith and painter's stores, which may frequently be required in large quantities, if so, the whole supply thereof might be left in their hands, if Messrs. Green & Co. are willing to bind themselves to rates which will permit the Public Works Department and Settlement Department to purchase the same without extra cost to the State.

15. It has been observed that at Port Blair there is a large stock of hardware on hand of many of the articles enumerated in Messrs. Green & Co.'s list. It is considered therefore that one of the conditions of sanctioning the supply of these articles falling into Messrs. Green & Co.'s hands should be, that that firm do undertake to take off the balance on hand from the Commissariat Department at rates to be determined by that Department, or at least should that firm not be so disposed, that they should undertake not to dispose of similar articles until the Government stock is expended, for it must be borne in mind that these supplies were obtained for the Settlement without allowing for any other source of meeting any extensive demand for the same that might arise, and that, therefore, they are subject to deterioration by keeping, and that a decided loss would accrue to Government, should Messrs. Green & Co. introduce the retailing of similar articles.

16. These latter conditions it is considered essentially necessary that Messrs. Green & Co. should comply with, in order to induce the Government to accede to their request at large.

17. Messrs. Green & Co.'s ruling rate in the supply of all the above articles would be subject to comparison with the price current which will be forwarded to the Superintendent of Port Blair from the Commissary General's Office at Calcutta. As in all probability should Messrs. Green & Co. be permitted to take up the proposed supply, free freight will be sanctioned by Government, an account would have to be kept confined to the actual supply of stores forwarded by free freight under the Settlement Indents, for if more free freight were taken upon such Indents than such actual supply required, the Commissary General will not be in a position to decide whether the proposed change is advantageous or otherwise to the State, and by

consequence as it is presumed that freight will be free, such charges as are made by Messrs. Green & Co. in excess of current rates, will represent cost of contingencies and profit on the transaction.

18. To meet Messrs. Green & Co.'s proposal an annual freight of about 600 tons or monthly free freight of about 50 tons would have to be granted to that firm by Government. Arrangements on this head should be clear, if Messrs. Green & Co. are to be held to in failure in their supplies. Assuming that this matter be clearly understood, it may be inferred that as Messrs. Green & Co. will in all probability obtain free freight from Government for the articles that they undertake to supply, it is not probable that the Government will charge them for freight for all articles that they may desire under sanction to introduce into the local markets.

19. Under instructions from the Chief Commissioner of British Burmah, freight at rupees 20 per ton will be charged upon all articles for which freight is available upon vessels coming from the Coast of British Burmah.

20. As a general rule, labor will be available upon payment for the same.

21. The above document is forwarded to Messrs. Green and Co. for information and consideration, pending the reply of the Chief Commissioner of British Burmah, to whom a copy has also been sent for his opinion and orders thereon.

No. 203 B, *dated* 20th January, 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*

To—Offg. Secretary to the Chief Commissioner, British Burmah.

I have the honor to forward enclosed for the Chief Commissioner's information, copy of a letter to my address (received the 17th instant) from Mr. M. Green of Port Blair, the original of which it appears he forwarded direct to the Chief Commissioner by the Steamer leaving Port Blair on the 16th instant. This document is stated to be in reply to a letter as per margin, and as it contains certain statements on which the Chief Commissioner will doubtless require explanation, I have marginally noted against each para. of Mr. Green's letter such remarks as I have to offer thereon.

No. 220, dated 9th June 1866, from Secretary to Chief Commissioner, British Burmah, to the Superintendent of Port Blair.

2. In forwarding the above communication, in which Mr. Green states that his previous application has been misconstrued, I have only to remark, that on consideration of what he now states to be his desire, I see no reason to alter any of the views on the subject expressed by myself and the Sub-Assistant Commissary General, already laid before the Chief Commissioner (*vide* copy thereof attached marked E-E) as to the supply by Mr. Green of certain articles required for consumption and otherwise at Port Blair; but I would respectfully remark that I should object to Mr. Green being permitted to exercise any *monopoly* in such supply, as I feel satisfied it would be prejudicial to the progressive interests of this Settlement, as well as unfair to the largely increasing free community, who, to meet their household requirements, would have no alternative but to purchase from Mr. Green, or wait probably at great inconvenience until they could obtain supplies from elsewhere.

Remarks by the Superintendent of Port Blair on duplicate of a statement stated to have been forwarded by MR. GREEN *to the Chief Commissioner, British Burmah, in reply to a copy of letter No.* 220, *dated* 9*th June* 1866, *from Secretary to Chief Commissioner, British Burmah, to the address of the Superintendent of Port Blair.*

REMARKS.

Para. of Mr. Green's Statement referred to.

1. The above mentioned duplicate was received on 17th January 1867, the day after the Steamer, with Mail, by which Mr. Green sent the original, left Port Blair.

Para. 2.

2. Copy of the paragraph referred to is annexed marked A.

Para. 3.

3. With reference to the statement made in this para., I beg to remark that after my return from Calcutta with the documents relating to this matter, I gave Mr. Green for 2 hours an opportunity of stating all he had to say on this subject, and then invited him to afford any further explanation or suggestion that he might desire to advance upon the subject.

Para. 4.

4. Mr. Green here apparently refers to the opportunity of consulting with the Superintendent upon the proposals under review.

Para. 5.

5. The document submitted by Mr. Green is the Statement, copy annexed, marked B.

Para. 6.

6. From reference to the records of this Office it does not appear that any "inducements" were held out to Mr. Green in connection with his starting business at Port Blair. It would appear from the copy of a letter attached marked C, that Mr. Green was originally employed in charge of the Store Department; and that having "forfeited the con-

fidence" of the then Superintendent, Major, now Lieutenant-Colonel J. C. Haughton, he was removed from that position of trust, and permitted to resign his appointment on the 15th February 1860; that subsequently, on an application from Mr. Green (apparently of 2nd April, but which cannot now be traced in this Office) the then Superintendent granted Mr. Green permission to open a shop at Port Blair on conditions, which will be seen by a perusal of the copy thereof herewith attached marked D, but what "inducement" was held out in the sense that Mr. Green apparently wishes it to be supposed there was, does not appear from that document; on the contrary, he was it seems required to at once close his shop and leave the Settlement, should the Superintendent for *any cause* deem it necessary to direct him to do so. In connection with the above, a letter (copy attached marked E.) was also apparently addressed to the Master Attendant at Calcutta, requesting him to afford Mr. Green a passage for himself and family, and freight for 5 tons of goods.

Para. 7. 7. It will be in the Chief Commissioner's recollection, that I had an interview with him at Rangoon on the 22nd of January 1866, and that on submitting Mr. Green's papers I received his instructions to communicate with the Commissariat authorities at Calcutta, and Port Blair, the result of which was made known to Mr. Green on two occasions, once on board the Steamer *Prince Arthur*, and once subsequently in Port Blair in an interview that Mr. Green had with me thereon, and it therefore remained with him to reply thereto when he pleased.

Para. 8. 8. Referring to Mr. Green's remark about "Sugar," I may mention that from the accompanying Extract from a Memo. marked F, from the Sub-Assistant Commissary General of Port Blair to my address, it would appear that Mr. Green recently raised his prices on that article.

Para. 9. 9. In this para. it would appear that Mr. Green expects godown accommodation to be provided for him.

Para. 10. 10. In accordance with the indulgence granted Mr. Green by my predecessors from time to time, freight on board of Government vessels proceeding to this Settlement has occasionally been afforded. But on board of merchantmen chartered by Government, it has not of late been so feasible to assist Mr. Green in this matter, as latterly it has become customary for the authorities at Calcutta to take up only so many tons of freight as are actually required on board, and any other available freightage remained the property of the owners and not for Government to allot. I am unable to offer any opinion on the latter portion of para. 10, but I may mention with regard to 1 vessel that Mr. Green alludes to, that many others, myself amongst them, were also similarly disappointed, the Captain of the ship having declined to take any goods for private parties.

Para. 11. 11. The Master Attendant at Calcutta was requested to afford free freight to Mr. Green to the extent of 10 tons at a time on his application for the same, by any Government vessel leaving Calcutta for Port Blair, independently of which in October 1865, a special application was made for a grant of freight to the extent of 30 tons in favor of Mr. Green, the Master Attendant being requested to allow the former application for 10 tons at a time to hold good as heretofore. As regards the rate per ton at which Government secures freight being less than that which Mr. Green states he has to pay, I suppose the same is owing to the Government requiring freight in much larger quantities and thereby procuring it at a cheaper rate than would be charged to parties requiring but a comparatively small proportion of freight.

To Mr. Green's statement that the chance of obtaining a few tons of free freight is almost out of the question, I beg to invite attention to the remarks above made upon the subject of freight.

I may mention with reference to Mr. Green's statement that 5, 6, and 7 months elapse before a single package can be received from Calcutta, that the Commissariat Department were from June 1866 to November of the same year without receiving supplies from Calcutta, so that in this respect it does not appear that freight is always available even for the Government.

Mr. Green no doubt incurs expenses in travelling, but he is in some measure relieved by being granted a free passage order when proceeding by Government vessels, thus only being called on to defray his Table expenses.

Para. 14. 12. With reference to this para. the circumstances under which Mr. Green settled at Port Blair have already been stated. *See* Annexures C. and D.

Para 15. 13. In para. 53 of Section "V—Jails," of the "Annual Administration Report" of this Settlement for 1864-65, it was stated that "such "assistance as can be is rendered to those self-supporting convicts who "keep shops, by permitting them the privilege of importing, free of "freight, small supplies of goods, opportunities offering by Government vessels." Copies of grants of land are herewith annexed.

Para 19. 14. I have already stated what was done at Calcutta in this matter, but I may add that on referring to the Secretary to the Government of India in the Home Department, that gentleman informed me that until Colonel Phayre's opinion was obtained, nothing could be done in Council. This, I personally told Mr Green on my return to Port Blair.

A.

That the Commissariat at Port Blair be instructed to cease indenting on the Commissary General, Calcutta, for the Articles enumerated below, and likewise be prohibited in obtaining the like from Maulmain.

Articles.	*Remarks.*
Pepper, Cloves, Cardamum, Nutmeg, Mace, Cinnamon, Cinnamon leaf, Sugar, Tobacco (both dry and moist,) Cummin Seed, Beetelnut, Catechu, Coriander Seed, Carraway Seed, Ginger (both dry and fresh), Garlic, Onions, Chillies, Turmeric, Camphor, Longcloth, Drill, Saloo, Chintz, Jaconet, Mull, Spotted Muslin, Swiss and Bookinuslins, Socks, Stockings, Broadcloth, Flannel, Sheeting, Dasotee, Madrascloth, Sarees, Needles, Cotton Tape.	Messrs. Green and Co. during the time of Major Haughton, always had on hand an ample stock of these articles and supplied the Settlement regularly to the satisfaction of the Superintendent and their constituents, but since the Commissariat took upon itself to introduce these in their Indents, it was considered advisable to cease getting them.

B.

Screws, Nails, Hinges, Axes, Dhas, Spades, Pickaxes, Hammers, Cold-Chisels, Chisels, Wedges, Bill-hooks, Crowbars, Files, Sledge, Hammers, Pit and Hand-saws, Saw-sets Bolts, Rod and Square Iron, Locks (both Brass and Iron), Hasps and Staples, Hooks, Karies, Carpenters' Tools, Augers, Scissors, Pen-knives, Needles, &c.	Messrs. Green and Co. have the means, as well as can command the necessary supervision towards the obtaining of these articles, and have in a measure assisted the Settlement in getting some of the articles enumerated. They are now prepared to go further into the matter if permitted to take up the regular supply to the Settlement.

C.

Lotahs, Thalees, Catorahs, Thuslas, Degchees, &c., &c. Iron and Copper Kettles, Fry Pans.	These articles Messrs. Green and Co. have always had on hand, but the Commissariat have much fettered them in introducing the articles in their Indents, and the stock which Messrs. Green and Co. have at present hangs heavy on their hands.
Zinc and Copper Sheets.	These they are ready to supply the Settlement if permitted to do so.

D.

Lime-juice, Turpentine, Vinegar, Beeswax, Tallow, Soap, (both English and Country) Chalk.	Messrs. Green and Co. have assisted in supplying the Settlement with these articles, and are prepared to have a goodly stock to meet the urgent demands of the Settlement.

Freight Free.

Messrs Green and Co. will much need the above, and further it will be necessary essentially in order that the Settlement may benefit and enable the suppliers to dispose of the articles cheaper than it otherwise would be, Messrs. Green and Co. had these articles free of freight and have from this indulgence managed with economy to withstand the severe shock given to them by the Commissariat and other individuals. The amount of tonnage required will be from 40 to 50 tons monthly, and by every available opportunity, so that there may be no delay in rendering the Settlement that benefit which this system, if permitted to be carried out, will ultimately prove to it.

Labor.

That a certain number of Prisoners (say 25) be made over to Messrs. Green & Co., and that they be held responsible for the men, paying the labourers themselves as is at present carried out in most of the Colonies.

No. 1.

PORT BLAIR SETTLEMENT.

THE SUPERINTENDENT, PORT BLAIR, on the part of the Secretary of State for India in Council, gives and grants unto MARK GREEN his heirs and lawful representatives for ninty-nine years, with full and sufficient powers to him and them to sell or dispose of the same as to him or them may seem proper, and subject only to the payment of any Police or other Municipal Tax or Taxes which may be lawfully imposed, a piece of ground on Ross Island, bounded to the Northward by a public road, and measuring on that side (222) two hundred and twenty-two feet; to the Southward by Government spare ground and measuring on that side (159) one hundred and fifty-nine feet; to the Eastward by a line of Cocoanut trees and public road, and measuring on that side (100) one hundred feet; to the Westward by a line of Cocoanut trees and public road, and measuring on that side (100) one hundred feet.

All rights not herein expressed are subject to any general Regulations for the grant of land at Port Blair, which may hereafter be formed under authority of the Governor General of India in Council, and it is a condition of this Grant, that the holder of it shall erect and maintain on the land herein specified a substantial dwelling-house or store, or shop, and that if he fail to do so at any time for the space of three years, the said land shall revert to Her Majesty, Her Heirs or Successors _____

No. 387, dated 20th April, 1867.

Memo. from—MAJOR H. NELSON DAVIES, *Secy. to Chief Commissioner, British Burmah,*

To—*Assistant to the Superintendent, in charge of Port Mouat.*

I have the honor to request you will favor me with a report on the messing system you have introduced among the convicts at Port Mouat.

1.—I wish to know what class of mess.

2.—What description of food they get.

3.—What quantity each man receives.

4.—What cooking pots are used; if copper, how often they are tinned.

5.—Whether you think you could manage to mess the whole of your gang, supposing you appointed a high caste cook, and let Mussulmen and Hindoos cook separate.

6.—How are you supplied with fish; and any further particulars which may occur to you.

Dated 10th May, 1867.

From—J. N. HOMFRAY, ESQ., *Assistant to the Superintendent in charge of Port Mouat,*

To—*Secretary to Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your Memo. No. 387, dated the 26th ultimo, and in compliance with the request made therein to state:—

1st.—That Hindoos and Mussulmen of all classes, natives of the Madras Presidency, mess together.—They are section gangsmen, 1st class, 2nd class, and 3rd class convicts.

2nd.—The description of food they get will be observed from the accompanying statement exhibiting average daily expenses of rations supplied to gang.

3rd.—A second statement is annexed shewing quantities each man receives.

4th.—Copper deckchees are used as cooking pots; in addition two brass tusslahs, seldom used for cooking, are made use of in serving the meals to the men, While the mess gang was on Ross Island, a twelve-month ago, these deckchees were tinned once in every two months; but since the opening of this place great difficulty has been experienced in tinning them, want of intrinsic *ranjah*, and men who know to tin them properly has put a stop to their being tinned; they are however properly cleaned so as not to affect the food cooked in them.

5th.—If an attempt was made to mess the whole of my gang, great trouble and difficulties would arise in the beginning, but in the end it would be successful when all arrangements could be made to conform to the caste prejudices of the up-country Hindoos and Natives of Bengal. High caste cooks are not always available, and even if they are, the Hindoos would require a larger number, owing to the sect differences which exist among them. For instance, a high caste Hindoo up-countryman would not touch fish or meat; he cannot therefore act as a cook, nor will he take his meals from any other hands.

6th.—Fish is supplied by the Government fisheries as well as by the self-supporting fishermen. Since December last, the Government fisheries began to work satisfactorily, though operations were commenced in 1866. Prisoner Gregory deserves credit for this, but since his illness in hospital, and the escape of 11 of his men, the supplies have been reduced.

Conclusion.—The mess gangsmen take their meals thrice a day; their first meal commences at 6 A. M., before they go to their work—all of them do not care to join in this; the time of their second meal is at 11 A. M., after they have returned from their morning work; and their last meal is at 6 P. M., after they have done with the day's work.

For further particulars, I herewith attach a separate Memorandum which, I dare say, you will find useful.

Dated 10th May, 1867.

Memo. by J. H. HOMFRAY, ESQ., *Assistant to the Superintendent, Port Blair, in charge of Port Mouat.*

In order to give full satisfaction to Major Davies with regard to my mess-gang system, it is necessary to explain its origin, together with several obstacles and losses incurred by it to Government, as also such advantages gained by it:—

I fairly commenced my duties in this Settlement as Harbour Master in October 1863, when the 9th division of convicts under my orders was formed by the Superintendent into the Marine or Boatmen division; this consisted of all classes—1st, 2nd, and 3rd, mechanics and coolies of all countries and creeds; the nature of the duty required my men to be always in attendance throughout the week, and even at times during the nights—holidays, Sundays, meal-hours and late hours could not be considered; and I soon found my small division, which was then 250

in all, not enough to get through the work with, and which was then, by the establishment of the Public Works Department, daily increasing. Ships kept pouring in successively, and at times 3 and 4 were in the harbour together—circumstances that never occurred before : my division was being greatly weakened by this hard work and irregular hours, and was fast filling the hospitals. I then obtained permission from Colonel Tytler, the Superintendent at that time, to allow me to put my men into a mess-gang so as I could work in time with the crews of vessels, and have no breakage of labor for food during the day, as the other divisional convicts had, *viz.*, from 11 A. M. to 2 P. M., being 3 hours during the best working portion of the day. I accordingly made arrangements to put all those boatmen and coolies working on Ross Island into a mess-gang. I had great difficulty the first two months in making them attend and eat the food ; the lower caste men had no objections and were glad at it, as it saved them much trouble and gave them good and plentiful food at regular hours—these were Madras convicts, not having any high caste men from that Presidency ; the cooks were selected from the pillay, chetty and pallie castes by their own wishes ; some few even of these Madrasses who were thieves having little money or friends on the Island, used to absent themselves from mess and even labor, till I adopted means of keeping them under close watch, but then again at night they used to steal away and eat elsewhere, refusing the mess-gang food. Several months passed away in this way, and it is only when their means had run out and their pay stopped that they came into the mess-gang. I had at that time 50 Madrassees only, all in one mess, with three meals a day. Another mess-gang of Hindoostanees and Bengalees I tried to establish, but this failed from caste prejudices of the several races—of different parts of the large tract of country that comes under the heading of the Bengal Presidency; the kind of food of those people varying so considerably that I found it very difficult to please them, unless I divided them into small mess-gangs of the different zillahs, which would have given me a deal of trouble by different quantities and qualities of food for each mess, as also loss to labor by several cooks ; besides these kind of men made poor boatmen, and I intended in time to exchange them all for Madrassees.

I always listened to all complaints my Madrassees made me, and personally attended to their food for several months till I got it into good working order ; very likely my ignorance of the Telegoo language prevented their making unnecessary appeals and false complaints, which convicts are always in the habit of making if they can get any one who will understand them and listen to their statements. It was very difficult to lay down any fixed basis for food, for at first they tried all ways for confusing the qualities and quantities of food, and also the irregular supply of fish and vegetables used to put me out a great deal ; latterly, I was obliged to have a garden and some fishermen set aside from the division, so as to be regular with these supplies, and by a couple of years I had 150 Madrassees as boatmen in the 9th division, messing together and enjoying good health and strength. I had to check the weighing and accounts and frequently attend meal hours, otherwise there used to be roguery carried on ; the Banniah, Moonshee and Bhandhareo worked hand in hand in stealing their food, the scale of rations which after much trouble I framed out could not be strictly attended to. All newly arrived convicts for the 1st two months, had a very great appetite, and I used to be obliged to increase their grain by a couple of ounces for that period, taking out from the ghee or vegetable a proportion to pay for that ; then again the convicts from the District of Maddra, which is in the South of Madras were great eaters of salt, requiring 1½oz. for each man per day, while the ordinary convicts were content with ¾oz. The fluctuation in prices of curry stuff varied considerably in the Commissariat, and also often run out of them ; the same was the case with the vegetable and fish.

The most of my boatmen were 2nd Class convicts. Owing to the hard work that they had always to contend with, in comparison to other Divisions, in this way I ordered that 7 pice worth of food was to be given them and 1 pice vegetable, fish or mutton, making in all about 2 annas, sometimes more and sometimes less, according to the fluctuations in prices. On the day fixed for the distribution of Divisional pay, the mess-gang men received 8 Annas for the 3rd Class, 1 Rupee for 2nd Class, and 2 Rupees for 1st Class and Toledars ; this was the only and best arrangement I could arrive at. There was a regular Cash account kept of the whole mess-gang doings, and if after all payments there was a balance, it used to be carried on to the following month, and when a large sum, it was disposed of either in money in equal shares to all the men of the gang, or sheep purchased cheap from ship Captains, as the Commissariat would refuse to give me any extra quantity. The cash given to the men's hands were for any extra articles they might wish to eat, such as sweetmeats, tobacco, sugar, meat, &c. This is the same system I have carried on at Port Mount, the greater number of mess-gang convicts unfortunately there are third Class, which compels me to give them only 7 to 7½ pice worth of food, also I am frequently obliged to give them vegetable and wild pigs gratis, being a new clearing, and hard work to get through, sacrificing all comforts. My mess-gang men have had a severe trial, and I must say I would have been at a great fix had I not adopted this system. I was able to keep my men together ; make them eat their meals at regular hours ; have more time for labor ; take less cooking space, locating them in the hulk ; not hoarding up money, knowledge of their eating proper food in fair quantities. Not having pay in hand the men were prevented from deserting with provisions, and also offering bribes to shorten labor ; these were all the advantages gained to Government. The loss was in supplying gratis cooks, utensils,

vegetables, pigs and also sometimes when the Superintendent ordered 4 hours leave to be given them during the hot weather, which was a dead loss to all advantages that I looked to gain by the mess-gang for Government, as they ate the food in ½ an hour from 10 to 10-30 and slept 3½ hours, besides having the 6 A. M. and 6 P. M. meals already cooked for them. There are two messes, one at Tytler's Ghat and the other at Garden Hill which have an Establishment of 4 cooks, 2 water bearers (who also split firewood) and when Burmah rice is given them, 2 extra men are obliged to be employed to clean it from filth and husk which it largely contains.

The mess-gang will be an advantage when the convicts work 10 hours which will allow them less time for vice; it will cost more to feed them, 8 pice for food ordinary, allowing them to have vegetable at 64 lbs, fish at 32 lbs. and mutton or beef at 12 lbs. for a Rupee; vegetable 3 times, fish twice, mutton or beef once a week, dholl daily, and once a week a change in quality of dholl, cash at 8 annas for 3rd Class, 1 Rupee for 2nd Class, 2 Rupees, for 1st Class and Toldars, 3 Rs. for Sub-Divisions and Mohurirs, 4 Rs. for Division gangsmen, and all such as are getting at present 8 Rs. The quality of food for the different Presidencies should be separate, as the up-country men prefer attah, coridh dholl, sugar, and a good large share of ghee. The Madrassee, rice, urhur dholl, and a large share of chillies, salt, pepper, tamarind and meat. Bengalees, rice, urhur dholl, chillies and mustard oil. To keep a regular supply of fish and vegetables, one section of 25 men for gardening and one section of 25 men for fishing should be set aside for one division of convicts. Of 400 in number, to be working under pay from Government, the produce of which should be given to the mess at the lowest fixed rate throughout the year; the self-supporters should be independent from this, who should bring their produce to market for the freemen of whom a large number are at every station, and several classes of different kinds of self-supporters would also exchange their barter one with another, for instance, bunnialis, cobblers, barbers, washermen, sweetmeat makers, potters, &c.

A mohurir must be set, aside independent of the Divisional Moonshee, only to attend to the messing, which must be superintended by a trustworthy Overseer, and any complaits they men have to make should be at once taken notice of and attended to by the Superintendent or his Assistants.

Brahmins and Chuttries should be allowed their full caste prejudices, and ought invariably to be picked out as cooks and servants to the messes. I do not think if strict attention be paid to my ideas that there can be any difficulty in having all the convicts in messes. The cooking pots should be of a metal called by Natives (Phool), or a mixture of brass and also brass *Tuslaha*.

Daily expenses of rations on account of Mess Gang at Tytler's Ghaut and Garden Hill for February, 1867.

No. 185, dated 23rd May, 1867.

From—LIEUT.-COL. B. FORD, *Superintendent, Port Blair,*
To—*Secretary to the Chief Commissioner, British Burmah.*

I have the honor to acknowledge receipt of your letter No. 515 of the 6th instant, requesting explanations with regard to certain Bills for the Month of February 1867 as per margin therewith forwarded, and in reply beg to afford the following additional information regarding those Bills as under:—

No. 709	No. 822
" 797	" 823
" 798	" 825 to 828
" 815	" 831
" 819	" 835 which are herewith returned.
" 820	

Questions.	*Answers.*
BILL No. 760.	
For Rupees 1,100-12. Cash paid to convicts. Is this all paid in tokens or silver?	It is paid in tokens and copper coin.
Do any of these prisoners receive pay from any other source; or for any other account than entered in this Bill?	No, they do not, unless being hired as servants, their masters choose to give them any small gratuity, which is quite optional.
BILL No. 797.	
Who are the 8 classes of convicts who receive pay, varying from 15 to 4 Rupees, which I have marked A to B?	1 Native Doctor ... at Rs. 15 1 Wholesale Bunniah ... " 12 1 Hospital Jemadar ... " 10 1 Office Moonshee ... " 10 1 Hospital Dispenser ... " 8 1 Native Licensed prisoner ... " 8 1 Kotwal ... " 8 1 Court Moonshee ... " 8 2 Office Writers in English Branch ... " 8 ea. 1 Post Office Clerk ... " 8 4 Havildars of Convict Police ... " 8 ea. 2 Duftries and 1 Office Moonshee .. " 7 ea. 10 Office Writers in Persian Branch ... " 6 ea. 3 Hospital Jemadars ... " 6 ea. 3 Hospital Mohurirs ... " 6 ea. 1 Commissariat Jemadar ... " 6 1 Free Bands Havildar (ex. convict) ... " 6 2 Hospital attendants ... " 5 ea. 25 Convicts employed in Commissariat Dept. ... " 4 ea. 1 Naval Brigade Dhoby ... " 4 2 Office Orderlies ... " 4 ea.
BILL No. 798.	
By what authority do children of convicts receive pay, and what rules exist for the several rates charged?	The children of convicts are paid under authority conveyed in Home Department's letter No. 4902 of 6th October 1864, to the address of the Chief Commissioner of British Burmah. The several rates are as follows:—Boys under 4 years, ½ anna per diem. Above 4 years and under 8, 1 anna per diem. Above 8 years and under 12, 1½ anna per diem. Similar allowance for girls save that their allowance 1½ anna is to be continued till they are 15 years, and after that 2 annas per diem till they are married.
BILL No. 815.	
Why is apparently a Supplementary Bill attached for convicts pay. That is, why was not all included in the previous Bill 797?	On the 16th January last, one complete section of convicts were sent to "Barren Island" for the purpose of procuring fodder, when these men returned, they received their subsistence allowance in advance for February and arrears for January 1867.

Questions.

2nd. As subsistence is paid in advance, how came arrears to accrue?

BILL No. 819.

What Officer was responsible that 929 bottles of milk were actually furnished to the sick in February?

BILL No. 820.

Here is another Bill for pay of prisoners, why not all included in one Bill?

BILL No. 822.

This Bill is headed for Hospital, Troops, &c., why is it not clearly shown whether it was for prisoners, or Troops, or for who? Separate bills should be submitted for Troops as distinct from Convicts. In this bill 1800 balls of thread are put down as issued along with eggs, chickens, butter, razors, and copper tacks. It is not possible to trace the Budget head under which the many articles are to be met, whether Medical, Clothing or what. The Bill in fact is imperfectly framed.

What is the meaning of 50 No. Petticoats, hire for stitching 12-8. Who were these Petticoats for? 50 Jackets, hire for stitching 12-8, who were they for? Why was cash paid for making them? 2105 balls of thread appear to have been consumed in making them, is this correct?

To this Bill there is a Voucher for 170 lbs. of Arrowroot stated to be purchased Departmentally, Rs. 42. What does this mean? Who paid the money? Who were the articles for, and who received the money? and was the money paid in tokens or coin?

BILL No. 823.

Extra Hospital diet for prisoners. It is understood the subsistence or pay of the patients, to whom this diet was supplied was stopped, but since subsistence money is paid in advance, explain the process as to how the money is recovered?

Answers.

Explained above.

Senior Medical Officer, Port Blair.

These men have been ordered to the Cocoa Islands, or Light-House duty, and received subsistence allowance on their return in advance for February and in arrears for January 1867.

This Bill is for Stores purchased by the Commissariat Department for Troops and Hospital use. Bills for similar transactions are submitted monthly.

Having referred the Bill to Lieutenant Laughton, Sub-Assistant Commissary General for explanation, he writes as follows:—

"The Accountant General has instructed me that all articles I purchase monthly are to be entered in *one* Bill supported by sub-vouchers, the question therefore arises, whether I am to attend to his instructions or those now contained in Major Davies' letter as to requiring separate Bills to be submitted.

"Major Davies appears not to understand the nature of my Bills, I do not restrict myself to the purchase of only such quantity of any article shewn therein for which requirements may have been made, but when I am out of anything, I purchase, may be, several months supply at once, which, perhaps, is issued subsequently to Troops and Convicts, Hospitals or any one else. It is apparent therefore that it would be extremely difficult to shew clearly whether such articles are required for Troops, Hospitals, &c. Again these Bills are not *issue* Vouchers but RECEIPT Vouchers. The Accountant-General audits my accounts in the *receipt* side in these Bills; I supply him with *other* Vouchers in support of *issues*. 1800 balls of thread are *not* shewn as issued, but as received lower down in the Bill, 105 balls of thread are shewn as having been used in making Petticoats and Jackets. The Petticoats and Jackets are for female Convicts' Hospital Clothing which were made up here, the hire for stitching was paid to self-supporting tailors hired for the purpose of making them. All labouring convict tailors available on Ross Island being employed in making up male convict clothing.

"The Arrowroot is Settlement produce, purchased by the Commissariat for the use of Hospitals for issue monthly, or as required, the payment of this money was adjusted by transfer; this supply will probably last some months."

Though the convicts are paid in advance, the hospital diet money is recovered in arrears from the convicts' subsistence allowance for the month following.

Questions.	*Answers.*
BILL No. 825.	
What is the meaning of Wages to Settlement Carpenters, Rs. 275, and extra allowances to Bhisties' and Dhobies, Rs. 20-11 6 ?	Wages to Settlement Carpenters mean sums paid to Chinese Carpenters for work done by themselves for the Settlement during February, and for directing and teaching of Carpentry work executed by convict Carpenters for Government purposes.
	Extra wages are paid to the Dhobies and Bhisties attached to the Detachment of European Troops to enable them to keep numbers on hand of materials of their trades, Fuller's, earth, firewoods, &c., water mushuks, straps, &c.
How is the cost of feed for Government cattle Rs. 596-1-9 adjusted, who paid, and who received the money ?	There are 4 Dhobies at Rs. 4 each. 3 Bhisties at Rs. 1 each, and 2 Lamplighters at 6 pie per diem each. The convict Bunniahs supply grain, &c., for the Government cattle and submit Bills for the same at the end of the month to the Superintendent, at whose office the amount is disbursed to them after check.
BILL No. 826.	
Who got the 18 rupees for tinning plates, and whose plates were they ?	Rupees 18 was paid to a self-supporting tinner for tinning cooking utensils, Settlement property, and used by the convicts messed on board.
BILL No. 827.	
Who is the Head Tailor that receives 6 Rupees a month ? and for what purpose is he required ? is he a convict or free man ?	The head tailor who receives Rs. 6 per month is convict No. 5526, Shaik Ally, who has the superintendence of making up all convict clothing.
BILL No. 828.	
Same question as above regarding head blacksmith ?	The head blacksmith is a free Chinese artificer employed under the Harbour Master, Port Blair, at Rs. 75 per month ; he directs and teaches all his convict blacksmiths, and works also himself.
BILL No. 831.	
Another bill for subsistence monthly, why not all included in previous bill 797 ?	This is impossible with but one Treasurer having no clerk, that all convicts subsistence allowance can be disbursed in the same day, those bills that are paid on or before the 10th of the month are brought in one bill, and those after the 10th in another, as under the new Rules, two sets of accounts are submitted, one for the 1st ten days of the month, and the other for the remaining days.
BILL No. 835.	
Commission to convict shopkeepers, 804-14-1. Is this paid in tokens or silver to the Bunniahs ? if the former, is it merely a fictitious expenditure ? that is, does the mere value of the copper, and the cost of making it into coin, represent the exact loss to Government ?	Paid by transfer. The expenditure in fact is a fictitious one, as the convict Bunniahs when paying money into the Treasury for the purchase of convict provision and such like articles, do so less the amount for their authorized commission at 3 Rs. 2 annas per cent.

No. 188, dated 29th May, 1867.

From—LIEUTENANT-COLONEL B. FORD, *Superintendent, Port Blair,*

To—*the Secretary to the Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 565 of the 13th instant, in which by direction of the Chief Commissioner, you state with reference to the quantity of the several articles that should be kept in Commissariat store in this Settlement that I had better arrange this matter in personal communication with the Executive Commissariat Officer.

2. I accordingly as a preliminary arrangement towards carrying out the Chief Commissioner's instructions, placed myself in communication with Lieutenant Laughton, Sub-Assistant Commissary General, on this matter, by addressing him in letter No. C 41 of the 14th May

copy attached) in which I invited him to meet me in the preparation of an Alphabetical List of stores as required in para. 3 of your communication under acknowledgment.

3. On this subject, Lieutenant Laughton has replied to me, see copy of letter No. 151 of the 23rd instant attached, in which he points out that preparation of such a list as you propose would be of no Departmental value for this reason, that to send such Lists to the Commissariat Officers of the Ports of Supply, would be but as it were to furnish them in another Form (not in Departmental use) with information that had been already placed in their hands by Lieutenant Laughton, in sending them his "Half-yearly Indents" moreover that those Officers would not be guided by such Alphabetical Lists, but would take their data in the provision of supplies, from the *Departmental* Half-yearly Indents above referred to, which affords, it appears, every necessary information.

4. You mention that you are merely "desired to bring to my notice the advantage of not keeping in store a large supply of articles which are liable to perish, or become wasted" than is necessary, and as Lieutenant Laughton and myself are now acquainted with the Chief Commissioner's wishes in this respect, we shall as a matter of course make it our duty not only to reduce stock, but to discontinue indenting for such miscellaneous articles as it is considered need not for the future be kept in store.

5. You remark in para. 2 of your letter that it is an Executive's (*i. e.*, Commissariat Executive) duty to determine what stores should be maintained, for what period, and what supply should be kept in hand: this being the case, and as the Executive Commissariat Officer of Port Blair can at any time from his existing records state not only what balance he has in hand of any article, and by average of issue know what his furture requirements for a given period may probably be, it appears to me, under the foregoing circumstances, that it would be imposing an extraneous duty upon Lieutenant Laughton to require these Alphabetical Lists from him, and I therefore beg, as you apparently left it with me to arrange this matter, to refer it to the Chief Commissioner before proceeding further, as to whether these Lists may not therefore be dispensed with, as I am of opinion they may be.

No. 41, dated 14th May, 1867.

From—B. FORD *Superintendent, Port Blair,*
To—LIEUTENANT A. F. LAUGHTON, *Executive Commissariat Officer, Port Blair.*

I have the honor to forward enclosed copy of a letter to my address No. 565 of 13th instant, from the Secretary to the Chief Commissioner, British Burmah, on the subject of the quantity of the various stores which should be kept in store here, and which he states I had better arrange in personal communication with you.

2. I shall feel obliged by the preparation of a List in Alphabetical order of all stores now in hand both Commissariat and Marine; and the duration of time they will probably last. From this List we are to note those articles which require to be kept in Store here, with columns showing the quantity, and the duration of time which it may be desirable to keep up a supply of each of them.

3. As soon as ever you have the List sufficiently in hand, I shall be happy from time to time to consult with you for its completion as above.

No. 151, dated 23rd May, 1867.

From—LIEUT. A J. LAUGHTON, *Executive Commissariat Officer, Port Blair,*
To—The Superintendent, Port Blair.

I have the honor to acknowledge the receipt of your letter No. 41, dated 14th May, forwarding copy of one from the Secretary to the Chief Commissioner, British Burmah, No. 565, dated 13th May, to your address on the subject of the reduction of stores on hand.

2. The preparation of a List shewing all articles on hand will be a tedious task, and when it is borne in mind that many of them consist of Office furniture, fixtures, and stock articles in use, a needless one also.

3. I understand from Major Davies' letter that it would be well to send the List proposed to the Commissariat Officers at Calcutta and Rangoon, but it would appear that the only object to be gained by this, to keep those Officers informed of our requirements, as, however, this information is fully given in my half-yearly Indents, these lists would be of no use whatever to them.

4. It appears to me that this matter which, as Major Davies justly remarks, is a purely Executive duty, can be performed by myself in communication with the Commissariat Officers at those Stations on each occasion of my indenting on them. Our requirements are best known to myself, and as I give ample notice stating when the articles indented for are required, nothing more appears to me necessary.

5. I purpose adhering to one principle in keeping up our supplies, that is retaining 9 months reserve stock of a few of the more important articles of food, and only 3 and 4 months of the less important articles and those of a perishable nature, if after a time I find I can, with safety, still further reduce my stock, I shall do so.

6. Many of the miscellaneous articles in store which can be disponsed with, I shall discontinue indenting for, and so allow the stock of them to be exhausted.

7. I trust you will see that this subject can be disposed of by myself, and that as it is one which requires my constant personal attention that the preparation of an accumulation of figures such as the statement called for, will be but a fruitless task, and will take up much valuable time of myself and clerks, which may be more profitably employed in the supervison and inspection of Records, with a view to carrying out this very proposed reduction of Reserve Stock.

8. Major Davies appears in his letter to have left the matter in your hands to be dealt with as you think fit.

N.

No. 199, dated 13th June, 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*
To—*Secretary to Chief Commissioner, British Burmah.*

The day before your departure from Port Blair, I received the Chief Commissioner's instructions in your letter No. 572, of the 4th ultimo, in which referring to the Proceedings of a Committee assembled on the 10th idem, to consider certain Police matters, I was desired to report.—

1*st*.—What arrangements can be made for erecting palisading round the several Police posts; what time it would take, at what cost, and what style of fence would best suit.

2*nd*.—It was also directed that a plan and estimate for adding a T head palisading and block House on the present Wharf should be furnished as soon as possible.

2. Consequent on the receipt of these instructions, I forwarded to Lieutenant Cumming, Executive Engineer, Port Blair, such extract from the Proceedings of the above Committee, as bore upon the above points, with my letter No. 37 E. E., of the 21st May to his address. (Copy attached.)

3. With regard to the 1st requirement of your letter, I have now the honor respectfully to state for the Chief Commissioner's information, that the desired erection of palisades round the saveral Police posts at Port Blair, has now been under consideration ever since the 4th of October last, when I, in concert with Captain Duncan, Inspector General of Police, British Burmah, made application for such palisading. It was not until the 1st of February that I received intimation from the Officiating Secretary to the Chief Commissioner, in the Public Works Department, that the Executive Engineer, Port Blair, had received instructions to prepare designs and estimates for palisading, as it appeared, on a design furnished by myself, in supersession of the one submitted by the late Executive Engineer, Mr. Marshall, which was considered "unsuitable." I attach copies of above correspondence for ready reference.

4. I beg now to attach copy of a letter as per margin, that I have received from Lieut. Cumming in reply to my letter above quoted, from which you will perceive that he has prepared and submitted palisade estimates, but though 8 months have elasped since these palisades were applied for, I regret that I cannot inform you what arrangements can be made for their erection, inasmuch as Lieutenant Cumming only now proposes in his para. 3 that the wood for their construction should be obtained from the Forest Department. Thus, therefore, it appears that no preparations have been made for their completion. Lieutenant Cumming does not state "what time it would take" for the construction of the work. He estimates the cost at Rs. 3,265. He describes the palisades that he proposes, in para. 5 of his letter, as designed on a sketch forwarded by the Chief Engineer, British Burmah.

No. 113 of the 10th June 1867.

These designs not having been shown to me, which I (seeing that I applied for the palisades submit they ought to have been, that at least I might have the opportunity of expressing my opinion thereon, I am unable now to submit any. The style of fence that I considered would best suit, was described in para. 4 of my letter No. 3227 of the 2nd January 1867, copy attached.

5. Regarding the direction under the 2nd head in your letter under reply, I beg to refer you to para. 6 of Lieutenant Cumming's letter under reference, in which that Officer states that he will submit estimates for adding a "T head palisade and Block House" to the present wharf, as soon as other work, which he has in hand, and which he considers more pressing, has been disposed of.

6. I shall take the earliest opportunity of submitting these latter estimates, as soon a I receive them from the Executive Engineer.

No. 37 EE., dated 21st May, 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*

To—*The Executive Engineer, Port Blair.*

I have the honor to forward for your information copy of a letter to my address No. 572, dated 14th instant, from the Secretary to the Chief Commissioner, British Burmah, also with reference thereto a copy of an extract from the Proceedings of a Committee assembled at this office on the 10th idem.

2 From the above documents you will observe that the Chief Commissioner desires me to report for his information as under :—

1*st*—As to what arrangements can be made for erecting palisading round the several Police posts ; what time it would take, at what cost, and what style of fence would best suit.

2*nd*.—And calling for a plan and estimate for adding a T head and palisading and Block House on the present wharf which should be furnished as soon as possible.

3. I therefore have now to request that you will be so good as to furnish me with particulars accordingly, as to the probable cost of erecting palisades round the several police posts, on the various stations of this Settlement.

4. On the subject of this palisading, I invite your perusal of my correspondence with your predecessor, and the Chief Engineer, British Burmah, which you will find in your office, —references thereto in margin.

Letter No. 23 dated 4th October 1866, from the Inspector General of Police, British Burmah, to the Superintendent, Port Blair. Letter No. 3070, dated 29th November 1866, from the Superintendent, Port Blair, to the Inspector-General of Police, British Burmah Letter No. 3079, dated 3rd December 1866, from the Superintendent Port Blair, to the Executive Engineer, Port Blair. Letters Nos. 330 and 331, dated 6th and 7th December 1866, from the Executive Engineer, Port Blair, to the Superintendent, Port Blair Letters Nos 3213 and 3227, dated 31st December 1866, and 2nd January 1867, from the Superintendent, Port Blair, to the Secretary to the Chief Commissioner, British Burmah, in the Public Works Department. Letter No. 1048—117, from the Assistant Secretary to the Chief Commissioner, British Burmah, in the P. W. D. to the Superintendent, Port Blair.

5. I have also to request you to furnish me with a plan and estimate for adding a T head with Block or Guard house thereon at the extremity of the present jetty ; also for a palisade so constructed across the shore end of the wharf from which the jetty runs, as to secure occupants of the Guard house on duty from a surprise from the rear ; the further objects to be attained by this Guard-house and palisade, you will find fully described in the extracts of Proceedings of the Committee hereto attached.

6. You will observe that I am desired to request that you will furnish these plans and estimates as soon as possible, and I shall be obliged by your transmitting them to me in order that I may have the opportunity of offering any remarks thereon, that may occur to me in submitting them for the consideration and orders of the Chief Commissioner, British Burmah.

No. 22 M, dated 4th October, 1866.

From—CAPTAIN H. T. DUNCAN, *Inspector General of Police, British Burmah,*

To—*Superintendent of Police, Port Blair*

I have perused with much anxiety the Diary of Lieutenant Jamieson, your predecessor, of the 25th August, in which he describes the forcible entry into the Police Station House at Navy Bay of Mr. Arratoon and a body of convicts for the purpose of rescuing him after his arrest for assaulting the Sergeant in the Station House.

It would appear that the rescue was effected, and the guard therefore were practically overpowered I notice also that up to the 6th September 1866, when Mr. Jamieson's Diary closes, no record is entered of any punishment having been inflicted on Mr. Arratoon.

I shall feel obliged by your informing me whether subsequent enquiry (as made by Captain Fraser) showed the circumstances as described in the Diary to be substantially correct, or if not, in what respect the Police were to blame ; are Mr. Arratoon and those who incited the convicts to enter the Station House, held excused from what seems a most serious offence; also be good enough to report whether any punishment has been awarded to Mr. Arratoon, or any of the persons engaged in the forcible entry of the Station House.

The fact of the guard having been overpowered in the manner described is one of grave importance, and fraught with consequences likely to be vital to the efficiency of the Police I trust, therefore, your Report will be full regarding all the questions put in this letter, as well as on any points which may tend to throw light on the matter.

There is one measure to be adopted which will aid in preventing a recurrence of such misfortunes, and that in the erection round each Police Station House, of a strong palisade, with a substantial gate. I shall address the Superintendent of Port Blair, requesting him to be good enough to have this done as soon as possible, and also requesting him to issue orders to prevent any convicts going inside the enclosure.

Should the Superintendent agree to this, which appears to be absolutely necessary in the present condition of the Station Houses, more especially after this unfortunate occurrence, I request you will from time to time report what Station Houses are provided with these safe guards.

No. 23 M, dated 4th October, 1866.

From—CAPTAIN H. T. DUNCAN, *Inspector General of Police, British Burmah,*
To—Superintendent, Port Blair.

I have the honor to enclose for your information a copy of a letter I have this day addressed to Lieutenant Lowndes, Superintendent of Police, Port Blair, requesting him to be good enough to report fully the circumstances relative to the Police in the Station House at Navy Bay, having been overpowered on the 24th August, by a party of convicts, for the purpose of rescuing Mr. Arratoon who had forced an entry into the Station House, and assaulted the Sergeant.

To aid in preventing a recurrence of such acts, I would strongly urge the importance of each Station House being surrounded with a strong palisade, and would earnestly request that if you agree with me in this, immediate steps be taken to carry it out.

The construction and position of many of the Station Houses, all indeed except perhaps at Ross, Chatham, and Viper, are such, that mobs of convicts cannot be kept off the building, nor can they be easily prevented from loitering about in close proximity to the Station House.

I would ask also that stringent orders be issued forbidding convicts to enter the palisade enclosing a Station House, and enjoining Overseers to avoid coming into personal conflict with the Police.

No 3070, dated 29th November, 1866.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*
To—Inspector General of Police, British Burmah.

I have the honor to acknowledge the receipt of your letter No. 22 of the 14th ultimo, enclosing for my information copy of a letter addressed by you the same day, to Lieutenant Lowndes, Superintendent of Police, Port Blair, requesting him to give you a report of the circumstances relative to an affair that took place between certain Free Police, and convicts at the Station of Navy Bay, on this Settlement on the 24th August last.

2. Lieutenant Lowndes is, I believe, preparing for you a statement from his Office records, but as possibly they may not afford such full particulars as I am able to supply you with, with reference to the affair, I have requested the Assistant Superintendent of Port Blair who held Magisterial enquiry into the matter, to reduce his proceedings thereon into a narrative form, and to append thereto his judgment, to which I have added my sentence in the case, which documents I enclose for your information.

3. In para. 2 of your letter, you mention that you would strongly urge the importance of each Police Station being surrounded by a strong palisade, and request that if I agree with you in this matter, that immediate steps be taken to carry it out, with reference to which I beg to state that I quite agree with you, that the construction of such palisades is, in my opinion very desirable as the means of prevention of surprise of Police Guards by any ill disposed convicts, as well as of at all times keeping the latter at a distance from the former.

4. As it will take the Executive Engineer some little time to prepare an approximate estimate for the construction of these palisades which I purpose to submit to the Chief Commissioner, British Burmah, and Agent to the Governor General for his sanction, I shall not be able to forward such documents to his Secretary by the present Mail, but will take an early opportunity of so doing; in the meantime I have issued such remaining supply as I have of *Cheveaux-de-frise*, (with which all Police Guards are at present supplied) as may the better protect them from intrusion.

No. 3079, dated 3rd December, 1866.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*
To—The Executive Engineer, Port Blair

No. 23 of 4th October 1866, from the Inspector General of Police, B. B., to Superintendent P. B.
No. 22 M. of 4th October 1866, from ditto ditto, to the Superintendent of Police P. B. No. 3070 of the 29th November from the Superintendent, Port Blair, to the Inspector General of Police, B. B.

With reference to the enclosed copies of correspondence as per margin, I have the honor to request that you will favor me with an approximate estimate, for the information of the Chief Commissioner, British Burmah for the construction of palisades around the Police Stations at this Settlement, according to the dimensions on which you have proposed to erect those structures, leaving what you consider a sufficient space between the several Police buildings and the palisades.

No. 330, dated 6th December, 1866.

From F. C. MARSHALL, ESQ., *Executive Engineer, Port Blair,*
To—Superintendent, Port Blair.

I have the honor to acknowledge the receipt of your letter No. 3079 of the 3rd instant, with annexures, calling on me to prepare an approximate estimate of the cost of constructing palisades round each of the Police buildings in the Settlement of Port Blair.

2. I observe in the 4th para. of your letter No. 3070 of the 29th ultimo, to the address of the Inspector General of Police, British Burmah, you mention your having issued the remaining supply of *Cheveaux-de-frise* (with which all Police Guards are at present supplied) I would beg information as to what quantity you are in possession of in the Settlement, as I am of opinion that it would be found cheaper and quite as effective to utilise this material instead of constructing palisades of jungle wood which would require to be renewed every two years. I would also be obliged by your informing me of the cost of *Cheveaux-de-frise* per foot run when I will submit a project and estimate for rendering the Police buildings secure from surprise.

No. 331, dated 7th December, 1866.

From—F. C. MARSHALL, ESQ., *Executive Engineer, Port Blair,*
To—Superintendent, Port Blair.

In continuation of letter No. 330 of the 6th instant, I would beg to suggest that in lieu of palisades of jungle wood being erected around the Police barracks in the Settlement to prevent a rush of ill disposed convicts, that a bank of earth constructed as below and neatly turfed be made on which the *Cheveaux-de-frise* be planted. This arrangement will therefore entail no additional expense, as the earth-work can be formed by convict labour, and should it be deemed desirable to fix a gate to the enclosure thus formed, this could also be added by convict labour.

2. The length of *Cheveaux-de-frise* required for the undermentioned Police barracks will be as follows:—Aberdeen, 340 running ft., Haddo, 340 running ft., Mount Harriet, 230 running ft., allowing a clear space of 10 feet all round.

3. I have made no provision for Chatham, Viper, and the Kutwallee on Ross, as the former from its position on the top of a very steep ascent is not likely to be surprised, and the two latter being contiguous to one hundred Military bayonets is not likely to be attempted.

4. The remaining positions can be provided for when the permanent buildings are being put up, but in the meantime, I would suggest an additional supply of *Cheveaux-de-frise* be obtained on the same favourable terms as that you now possess.

5. If you have no objection, I will cause the bank for the *Cheveaux-de-frise* to be put in hand at once.

Dated 1st February, 1867.

From—MAJOR W. S. OLIPHANT, R. E., *Offg. Secy. to Chief Commr., B. B., in the P. W. D.*
To—Superintendent, Port Blair.

I am directed to acknowledge receipt of your letter No. 3227, dated 2nd January 1867, relative to the construction of palisades around the several Police Stations in Port Blair, and in reply to inform you that the Executive Engineer will be requested to prepare designs and estimates for the same in communication with yourself and the Police authorities.

The Chief Commissioner is disposed to agree with you regarding the unsuitability of the arrangement proposed by Mr. Marshall, and would prefer the simple palisading as recommended.

No. 3227, dated 2nd January, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*

To—Secy. to Chief Commissioner, British Burmah, in the Public Works Dept.

I have the honor to forward enclosed copies of correspondence as per margin, upon the subject of information of a palisade around the several Police Stations at Port, Blair which has been recommended by the Inspector General of British Burmah, and in the necessity for which I fully agree with that Officer.

No. 22 of 4th October 1866, from Inspector General of Police, British Burmah, to the Superintendent of Port Blair, with enclosure.

No. 3070, of 29th November 1866, from Superintendent, Port Blair, to Inspector General, British Burmah. No. 3079, of 3rd December 1866, from Superintendent of Port Blair, to the Executive Engineer, Port Blair. No. 330 of 6th December 1866, from Executive Engineer, to the Superintendent of Port Blair. No. 331 of 7th December 1866, from Executive Engineer, to the Superintendent of Port Blair.

2 From the enclosed it will be seen that I called upon the Executive Engineer of this Settlement to be good enough to furnish me with an approximate estimate for the construction of such palisading, for submission to the Chief Commissioner for his approval and sanction.

3 The Executive Engineer in his reply, suggests that a bank of earth on which a Cheveaux-de-frise be placed be substituted for the palisading, a sketch of which is inserted in his letter, No. 331, marginally noted.

4 I must, however, respectfully beg to say that, although I am of necessity alleged to submit this suggestion for the Chief Commissioner's consideration and orders thereon, I entirely disagree with the same, inasmuch as I cannot see how a Cheveaux-de-frise placed on an elevated bank, and easily pulled down therefrom, can be any effectual check upon a rush made by a body of convicts, at any of these Stations, and as the exterior slope of the Executive Engineer's design shews a base of 3 feet, thus causing a slope which would render it a comparatively easy matter for a body of ill disposed convicts to rush up and by simply attaching a bullet, stone, or any other thing handy for the purpose, to the end of a line and thereby at once obtaining a "hitch" by throwing it over the Cheveaux-de-frise to pull it down, a result that would be rendered still more easy from the fact that, observing an inaccuracy in the measurement of the design given by the Executive Engineer, I find that by drafting the same to scale, that the slope of the proposed bank would actually present a much more easy angle, than is shewn in the Executive Engineer's sketch, and which would consequently afford a greater facility for an effectual breach in the Cheveaux-de-frise and pulling it off the earth work altogether.

5 A good strong palisade of perpendicular timber having slight interior earth banqueth* protected without by having the Cheveaux-de-frise secured to substantial uprights of timber bolted or chained to the palisade in which the frise would revolve would, I respectfully submit for the Chief Commissioner's consideration, be by far the most effectual preventative against any attempt at attack by convicts upon these Stations.

6 In conclusion, I would therefore respectfully request, should the Chief Commissioner be pleased to approve of the views of the Inspector General of Police and myself in this matter and the adoption of my suggestion, he will be pleased to issue the necessary orders for the construction of palisades, earth and Cheveaux-de-frise work round these Police Stations.

---

* *Sic* in copy.—P. D.

No. 113, dated 10th June, 1867.

From—LIEUTENANT W. G. CUMMING, R. E., *Executive Engineer, Port Blair,*
To—Superintendent, Port Blair.

I have the honor to acknowledge the receipt of your letter No. 37 E. E. of the 21st May 1867, together with copies of correspondence as per Memo. all with reference to precautionary measures which is deemed necessary for the safety of the Settlement in case of an outbreak or an attempted rising among the convict population.

With reference to para. No. 1 of letter No. 572, from the Secretary to the Chief Commissioner, British Burmah, to your address and which is embodied in the 1st head of the 2nd para. of your letter now under consideration, I beg to state that according to instructions received from the Chief Engineer, British Burmah, I have already prepared and submitted plans and estimates for erecting palisades round the several Police barracks in the Settlement.

I do not think that these palisades can be made with rapidity, unless I can obtain a much greater supply of timber from the jungle. I would, therefore, recommend that the Forest Department be requested to supply such round sound timber as may be required for the works.

The estimated cost for the palisades round the Police barracks is Rupees 3,265.

The palisades will consist of good round timber, well sunk into the ground and raised 9 feet above it, and spiked at the top, posts to be at 5 inches interval and firmly secured to each other by horizontal traces near the top and bottom, such Police Barrack palisades will in addition be supplied with a strong heavy teak gate way well secured. The plan and estimate for these palisades is in accordance with a sketch forwarded by the Chief Engineer, British Burmah.

With reference to para. 2 of your letter, I will forward a plan and estimate for adding at Head palisading and Block House on the present wharf, after the more pressing plans and estimates for sanctioned buildings have been prepared.

With reference to the concluding para. of your letter, I regret to state that as the plans and estimates for these Police barracks palisades have been submitted to Rangoon for sanction, I am unable to forward them to you for your inspection and remarks.

O.

No. 198, dated 14th June, 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*
To—Secretary to the Chief Commissioner, British Burmah.

I have the honor to report, for the information of the Chief Commissioner of British Burmah, the arrival, at this Settlement, of the Government Transport *Czarewitch*, of 886 tons. This is a fine new vessel, bought, as I am informed, by Government, pincipally for the service of this Settlement. The vessel is under the command of Captain Wells, Junior.

2. The *Czarewitch* brought down a cargo of 600 tons Commissariat stores and 1000 sheep; she left Calcutta on the 1st instant and arrived at Port Blair on the morning of the 9th idem.

3. Unfortunately no less than 63 sheep died on the voyage, and 38 the day after landing. Consequent upon this heavy loss, and with a view to taking such measures as might prevent a recurrence of such mortality in future consignments of sheep, I have caused a Committee to be assembled to enquire into the matter, copy of whose Proceedings I enclose for the information of the Chief Commissioner of British Burmah.

4. It will be observed that a number of the sheep are considered to have been in poor condition when shipped, and that the majority of those that landed, though appearing healthy, were lean, and not in such condition as the other sheep in the Settlement.

5. Overcrowding, a want of ventilation and cleanliness, appear to have been the causes to which the sickness on board is attributed.

6. The Committee have made what appears to me to be an excellent suggestion, *viz.* that *Topases* or others accustomed to go to sea, be sent down in charge of sheep in future; for it is considered that let ever so many attendants be sent, if they are liable to sea sickness, the sheep will suffer badly for want of care.

7. I would beg, therefore, to request that the Chief Commissioner will be pleased to move the Marine authorities at Calcutta to provide such attendants as are recommended for the care of sheep at sea, who should receive them over from the Commissariat shepherds on delivery on board ship at Calcutta. I would also solicit that the Marine authorities be moved to give, if possible, more ventilation *aft* on board this vessel, and at least 6 feet 6 inches of superficial feet of deck for each sheep shipped for Port Blair.

8. I have desired the Sub-Assistant Commissary General to make application to the Commissariat authorities at Calcutta to have all sheep shorn before shipment; if this is done, and the sheep have the space I have applied for, they ought, if shipped in good condition, to come down comparatively healthy.

P. S.—The Sub-Assistant Commissary General in a letter No. 203 of the 17th instant, informs me that the deaths amongst the sheep landed from the *Czarewitch* up to date, has been 79, making a total, with the 63 which died on board, of 142.

DUPLICATE.

Proceedings of a Committee assembled at Port Blair, on the 11th June 1867, by order of the superintendent of Port Blair, to enquire into the cause of the great mortality which occurred on board the sailing vessel Czarewich *amongst sheep while on board and since their landing, and also to report upon the condition of the animals, compared with those which had been in the Settlement some months.*

1. The Committee find that 1,000 sheep were said to have been put on board the ship *Czarewich* while lying off Calcutta on the 1st June.

2. That on arriving at Port Blair on the 9th instant, 952 were landed alive and that 63 died during the voyage, making a discrepancy of 15 which would seem to have been put on board over the 1000, intended.

3. That since landing to the present time, the evening of the 11th June, 38 have died or are moribund, and that several of the others are in a sickly state.

4. That a number of those, which seem sickly have a discharge from the nose, and that it would be advisable to have all so affected immediately separated from the others.

5. That the great majority of those landed seem healthy, although rather lean and not in the same condition as those which have been some time in the Settlement and well fed, but this could scarcely be expected.

6. That on board the *Czarewich* the sheep seem to have been much overcrowded' having had only about 5 superficial feet of deck for each sheep.

7. That all the ports between decks had to be kept closed during the voyage, and that consequently the means of ventilation were deficient, but more particularly in the after part o the vessel, where there was only one small ventilator which passed through the Saloon.

8. Of the casualties on board, nearly all occurred amongst the sheep in the compartments about the afterhatch, and this although the want of ventilation was noticed, and 100 sheep were removed from this part of the ship daily, and 100 others put in their place.

9. Fifteen men were sent to attend on the sheep, but as soon as the vessel got to sea all became sea-sick, and could do little or nothing in looking after them, so that this duty devolved in a great measure on the ship's crew.

10. The Committee are of opinion that the sickness and mortality arose from overcrowding, deficient ventilation, and want of due attention to cleanliness during the voyage.

11. As the *Czarewich* is likely to be repeatedly employed in bringing sheep from Calcutta to Port Blair, they would recommend that in future none be located more than a few feet abaft the afterhatch, and that not more than 600 or at the most 650 be kept between decks ; also that instead of 15 cattle attendants being sent along with them some four or five extra topasses be put on board, men who are accustomed to go to sea, would do more work and cost less than 15 landsmen, and that these men be entirely employed in seeing that cleanliness is duly attended to between decks, and in looking after the feeding and watering of the animals.

12. The Committee would also recommend that in future all sheep be shorn before being put on board as they conclude that this would lessen the sick from damp and dirt and tend to diminish the mortality which, in the present instance, has amounted to 10 per cent in the short period of 11 days.

A. L. GAMACK, M. D., *Civil Assistant Surgeon,* } PRESIDENT.

W. T. MUCH, LIEUT., 2-24*th Regiment,* } MEMBERS.
C. ERSKINE, LIEUT., 2-24th *Regiment,*

P.

No. 202, dated —— 1867.

From—LIEUT.-COLONEL B. FORD, *Superintendent, Port Blair,*
To—*Secretary to the Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 580 of the 14th ultimo, in which by order of the Chief Commissioner, and consequent upon your receipt of the Report of a Committee of Medical Officers, recently appointed to consider certain points connected with the sanitary and general progress of this Settlement, you bring certain important matters noticed by them to my attention, which call for immediate action.

2. I purpose to notice these matters *seriatim*, and to report for the Chief Commissioner's information what action has been taken thereon. In the present communication, I take up the first point noticed by you, *viz.*—the scarcity of vegetables.

3. In your letter under reply, you remark that "there is no satisfactory reason given why such an essential article of diet as vegetables, should be allowed to fall short, when the productive qualities of the Settlement could, with little trouble, be made inexhaustible." You also consider "the present rates of charge for vegetables as beyond the means of the poor," with reference to which I desire briefly to state, that though the supply of vegetables has not been equal to the demand of a population that during the last year has been rapidly augmented in numbers (and in 18 months has been I may say doubled), yet as regards the produce, I venture to assert that there has *never* been such a good vegetable year as yet on the Settlement, as the past, and this has been effected with but a slight addition to cultivation labor, while my records prove that since I have been on this Settlement, I have all but quadrupled the vegetable supply. This, on calculation, has provided at an average of ¼lb. per diem of vegetable diet to every individual inhabitant.

4. If I be allowed to devote thereto sufficient labor, there is no reason why the vegetable supply should at all fall short. I feel confident that the Chief Commissioner will admit (while my correspondence from first to last proves that I have sought to be allowed to increase the number of cultivators) that seeing I have ever been urged by the most stringent orders of Government to strain every nerve for the completion of Public Works,—that in view thereof, and the other essential labor demands of the Settlement, I could not, in the absence of any accorded permission to increase such number of cultivators, venture to employ more convicts on cultivation, than such as by their labor, were continuing steadily to augment the vegetable supply.

5. Experience has at length shown that it is not to a want of vegetables primarily that the œnemic condition of many of the convicts is to be attributed, but rather to those malarious influences which induce fevers, which so rapidly change to spleenic, and other more fatal diseases. Dr. Gannack states this in his evidence before the Committee. See para. 29.

6. There can be no doubt, however, but that an increase to the vegetable supply is highly desirable and important, and that if possible 1lb. weight per diem should be available to the convict for purchase, and if possible at a lower cost than the present sanctioned rates. In view of these *desiderata*, and it being very essential that such supply should be speedily available, I have considered it advisable to call to my aid the assistance of a Committee of Officers to ascertain—

1st.—What the vegetable requirements of the Settlement actually are

2nd.—To what extent those requirements are now supplied.

3rd.—The best means of possessing a sufficient stock.

4th.—To suggest rates for sale of vegetables.

5th.—To select the best localities for further cultivation.

6th.—To point out the most economic and prompt means of raising the required supply.

I therefore called upon the Officers as per margin, to assist me in the above enquiries, and I beg to enclose for submission to the Chief Commissioner, the Proceedings of that Committee in which he will see that they have taken great pains to arrive at reliable conclusions on the above points, and for which I feel myself much indebted to them.

Captain the Hon'ble J. H. Fraser, Assistant Supdt.
Lieutenant A F. Laughton, S. A. C. General.
J. N. Homfray, Esq., Assist. to the Superintendent.

7. It will be observed from this Report that the Committee consider that 1lb. of vegetables per diem to each individual (free and convict) should be made available for sale in the Settlement markets. I beg to recommend that such supply of vegetables per diem should be served out to the convicts, and the cost thereof recovered from their subsistence money. It appears that 3,000,000 lbs of vegetables per annum will be necessary for the present demand at the above rate; and that an increase of 2,630,000 lbs has to be provided over and above the present supply,—that jungle clearing being objectionable in the moïsoon, such other localities as can be worked without clearing, be put under cultivation.

Eventually the Committee advise that all cultivation be undertaken in one spot (I have my doubts about the practicability of this last suggestion).

300 acres of land appear necessary for the purpose, and they strongly recommend that an Officer able to enforce his orders, should be appointed solely for the duty of supervising such cultivation upon a regular system. This Officer should (they propose) keep a register,—recording results as regards produce, cash outlay and return. This book should also afford clear record of those who are, and who are not industrious cultivators; that experimental plantings of certain vegetables and condiments be at once made under certain rules; that vegetables from Government gardens be sold at 8 lbs per 1 anna; that those sold by the self-supporters be charged at 2 or 4 lbs per anna according to the season; that land which the Committee indicate, on which jungle has already been thinned, be put under cultivation, and that a sufficient supply of labor be provided.

8. This land that the Committee here indicate is identically the same, being the head of the tract, that I had in view when penning my letter to the address of Captain Hildebrand,

Officiating Secretary to the Chief Commissioner, British Burmah, No. 51, of the 21st July last, in which in para. 8 under head 3rd (see copy attached) I drew attention to rich and flat land lying southward, to which the valley indicated by the Committee, is the very entrance. It will be observed from the attached extract from the above letter, that I pointed out the value of the soil of the country above described, and had only hesitated to push cultivation to the southward, until "Port Mouat" should be occupied as a station, thereby enabling us to hold the aborigines to the southward of Port Blair in check. This occupation of "Port Mouat" has now been effected, the result has been that the southern tribe hitherto but little known to us, have come in, and submitted to us, and the time is therefore now come when cultivation may be safely pushed to the southward without fear of molestation to the cultivators, who will now themselves feel more confidence in taking up land allotments as self-supporters in that locality.

9. The Committee have also recommended cultivation on a considerable tract of land lying on the slopes, east of "Navy Point." This land I had commenced clearing during the past dry season, for this very purpose. Mr. Doyle, Overseer of cultivation, reporting to me on this land, says "it is as fine land as that of Mount Harriet" and capable of producing more and sufficient vegetables for the Station. I hope to bring a great portion of it soon under cultivation, the return of which cannot fail, but be satisfactory.

10. For an extension of cultivation hereafter, the Committee also indicate land lying between "Aberdeen" and "Navy Point," which they "believe will be found of a superior kind." It does not appear, however, that this land has been examined, nor is it necessary now to determine whether this portion shall be opened. I am doubtful, considering the proximity of the Phœnix Bay Swamp, whether the operation of the exposure of this land would not be a considerable risk to the adjacent largely inhabited station of Haddo. Sufficient land at all events has been indicated by the Committee on which to commence immediate operations. The direction of any further extension, I should wish to be made into the interior to the southward, for of this land I can speak with confidence.

11. The Committee brings to notice an offer of Mr. Homfray, Assistant to the Superintendent, to supply the whole of the vegetables required if he be allowed 600 men for the work at "Port Mouat." This is at the rate of one gardener to every 13½ individuals, appears to me to be more than is needful. If Mr. Homfray had undertaken, say, at the rate of 5 or 6 per cent. I should have been more prepared to recommend his proposition than at present. I consider it most due to Mr. Homfray to bring to the Chief Commissioner's notice his very praiseworthy and successful efforts on the cultivation of vegetables at "Port Mouat," I beg particularly to draw attention to para. 63 of the Report of the Sanitary Committee. Dr. Cowie, of that Committee, personally stated to me that "he never saw such fine vegetables, and in such quantity on a given space in India, in all his life."

From the favorable report of the health of the convicts at "Port Mouat," I trust if that Station be found in a similarly satisfactory sanitary condition, after the present wet season, that cultivation may be there resumed and extended.

12. It will be observed that on the whole the Committee recommend Government garden cultivation on the conditions that they have laid down, and under the supervision of an Officer, in preference to the self-supporting garden system. The Committee reckoning the value of the convict labor at 4 annas per diem, and allowing 2 men per acre.

13. As shown against the cost at which it is proposed that vegetables should be sold, I find that there will be some small loss to the State, but this loss will be nothing to the gain that it is hoped will be effected in the health of the convicts. I am in doubt, however, whether 2 men per acre will be sufficient to clear new land, and consider that double the number will be necessary till the first crops are on the ground.

14. It will be perceived that the Committee do not recommend any interference with the existing self-supporting cultivators.

This opens up the important question already before Government for consideration, as to the Rules under which Licenses to be at large on these Islands are to be granted to Native convicts of good character, with a view to their being encouraged to settle and lay out their savings as cultivators &c. But to enter upon this here, will be foreign to the subject.

15. I have now therefore to solicit sanction—

1st.—For the appointment of an Officer to superintend cultivation. This official I would recommend should be an uncovenanted officer, drawing a salary of Rs. 350 per month with quarters, having a boat and crew at his disposal.

2nd.—To the occupation of the lands recommended for cultivation.

3rd.—To the employment of the number of convicts that are requisite for the extension of such cultivation.

4th.—For the outlay of a portion of the amount budgeted for under head "Cultivation" (Rs. 2,000) in the purchase of the necessay tools, seeds, &c. required for the above purpose.

16. In conclusion, I beg to state for the Chief Commissioner's information that I am getting the land referred to at "Navy Point," as rapidly under cultivation as I possibly can; that several plots of suitable newly cleared land are being distributed along the road between Haddo and Navy Point, and that clearance is being commenced in the Valley to the southward.

Aberdeen, and I beg to assure the Chief Commissioner, without further remark, that I shall endeavour, as far as lies in my power, until I hear from you on the subject, to give all effect to his suggestions on the Sanitary Committee's Report on cultivation

---

Report of a Committee assembled by order of LIEUTENANT COLONEL B. FORD, *Superintendent of Port Blair, for the purpose of obtaining information and reporting on the following points relative to the supply of vegetables required for the use of the Settlement.*

1*st.*—What is the amount of the present demand of vegetables on the Settlement.

2*nd.*—The extent to which that demand is supplied.

3*rd.*—The best means of procuring and maintaining a sufficient stock of vegetables.

4*th.*—To determine rates for the sale of vegetables.

5*th.*—To decide upon the best localities for the cultivation of vegetables.

6*th.*—To consider whether the raising of vegetables by self-supporters or in Government gardens will be most advantageous.

PRESIDENT.

CAPTAIN THE HON'BLE J. H. FRASER, *Assistant Superintendent.*

MEMBERS.

LIEUTENANT A. F. LAUGHTON, *Sub-Assistant Commissary General.*

J. N. HOMFRAY, ESQ., *Assistant to the Superintendent.*

The Committee having assembled and considered the various points offered for their attention and report, and having visited the localities which are likely to prove advantageous for the extension of the vegetable cultivation of the Settlement, and also the various Government gardens and those of self-supporting cultivators, and having made enquiries on the subject proceed to give the result of their investigations by recording their opinions on the above-mentioned points taking each one in detail.

1*st.*—It is difficult to ascertain what the actual demand for vegetables is, but the Committee considers that the supply should be such as to provide every free person, and every convict with 1lb. per diem, but as it is probable that the convicts will not of their own option lay out as much of their pay as they should on this article of food, that 1lb should be served out daily to each convict and the cost of the same recovered from his subsistence money. If some arrangement of this kind is not made, it is likely that the whole of the vegetables produced would not be used, and loss would consequently occur. Steps should however be taken to provide as great a variety of vegetables as it is possible to raise.

The number of persons to be provided is now about 8,000, which number of pounds of vegetables would therefore be required daily or in round numbers 3,000,000, lbs per annum. This supply will have to be increased proportionally as the strength of the convicts is increased.

2*nd.* From enquiries made it would appear that the present supply amounts to about 3,70,000 lbs or 2,630,000 lbs short of our requirements ; steps should therefore be at once taken for raising a continuous supply to the above extent.

3*rd.* In recommending the adoption of steps for the above supply, it will have to be borne in mind that the Medical Officers prohibit the clearing of Jungle at this season of the year, the immediate extension of the supply will therefore have to be made in such localities as it will be possible to do without having recourse to clearing : The Committee therefore recommend that vegetable cultivation be at once extended and variously pushed on in the localities hereafter to be named, and that when the clearing season commences land be opened out on one spot to an extent sufficient to raise the whole of our wants in the same place.

From careful enquiries the Committee have come to the opinion that each acre of cultivated land can be made to produce 10,000 of vegetables of various kinds, taking one with another. 300 acres would therefore be necessary to be put under cultivation to produce the quantity required to be raised. The Committee find that not more than 55 acres are now actually producing vegetables, including Government gardens, and those of self-supporters.

The Committee consider that the cultivation of the Settlement should be placed under a regulated system and be supervised by an Officer who should be set apart solely for this purpose, and be held responsible that he adhered to the rules laid down for his guidance, the principal points of which should be that he had his land planted in proper proportions with all the varieties of vegetables for used food, and the making up of curry stuff. He should also be careful to plant his land in a way that he could ensure a supply during the hot months by reserving the lowest portions of it for that time of the year, and also by storing vegetables of the drier kinds such as sweet potatoes, yams and pumpkins for issue during those months.

The Officer should also be required to keep up a Statistical Register in which might be entered the number of acres under cultivation in each Government garden and in each self-supporter's land, also the number produced daily, and at the end of the month, the number of acres or square yards brought under cultivation during the past month. The sum of the 1st and last columns would then be carried on to form the 1st column of the next month's Register.

The assistance of the out-post Overseers would be required to assist him in keeping dn this document by weighing the daily produce of the gardens and keeping a record of it.

This plan it is believed will be highly beneficial by inducing men to do their utmost, and by discovering who are deserving and who are careless. The Register itself will prove to be a valuable statistical record for future reference.

The Officer in charge of cultivation should, it is considered, be placed over all the convicts employed in the work; they should not be liable to be removed under any pretext whatever from under his orders for other works, and he should have such power over them as to be able to enforce his orders and compel them to work out their appointed tasks. He himself would be held responsible that he produced vegetables to the extent to which it may be proved the land is capable of bearing.

As an experiment for future guidance, the Committee recommend that vegetables and condiments be planted out at once in plots of ground restricting each kind to separate plots of exact dimensions, measured say one beegah for each; that a careful daily, monthly, and yearly record be kept of these plots and their produce, and that one man be allowed for each plot. The following vegetables and condiments are recommended to be expermentalized upon in the above manner, yams sweet potatoes, karen potatoes, pumpkins of sorts, brinjalls, bendies, cucumbers, turoie, chillies, turmeric, ginger, and gurraylah.

4th. The Committee are of opinion that half a pice per ℔ or 8 ℔s for one anna is a fair rate to be recovered from subsistence money of convicts for vegetables issued to them from Government gardens, and that self-supporters be limited to charging one pice per ℔ for vegetables sold by them from 1st June to 30th November, and two pice from 1st December to 31st May.

5th. The localities where land is available for extending the vegetable cultivation of the Settlement for producing an immediate increase of the supply are situated at Aberdeen and Navy Bay Point. At the former place a small Government garden under Overseer Scott already exists near the Cricket ground; to the south and west of this ground land has been considerably opened out by wood cutters and charcoal burners; as far as the land given to self-supporters No. 7261, Kefawutoolah, and No. 828, Gobind. Overseer Scott should be instructed to extend his cultivation as far as is possible over this land, he being provided with a sufficient amount of additional labour for the purpose. At Navy Bay Point also on the Haddo road a considerable tract of land has been cleared and only needs planting. Officiating Overseer Jeet Sing, it is considered should be directed to extend his cultivation in the same way as much as he can. It is also recommended that the experimental planting on separate plots of land as suggested above be placed in his hands under the supervision of Mr. Doyle the present cultivation Overseer. . As to the locality to be fixed upon for future clearing and opening out for cultivation, the Committee are of opinion that Aberdeen will prove to be the best, commencing from the last self-supporters ground on the right hand side of the road going from Aberdeen to Navy Bay, and extending along the road as far as the latter place and to within a quarter of a mile of the sea on the southern coast of the Harbour. It is believed that these boundaries enclose at least 300 acres of low land where the soil is of a very superior kind.

The Committee would observe that Mr. Homfray wishes to repeat an offer which he made to the Sanitary Committee lately assembled, but which he understands has not been recorded on their Proceedings to the effect that he undertakes to supply the quantity of vegetables we require and to keep up the supply to its full extent provided he has 600 men placed at his service solely for this work at Port Mouat. He would at once supply a portion and in 12 months hence provide us with the full quantity.

The Committee believe that it is possible to do this, but think the full supply could not be provided so early as 12 months hence, as 100 acres only out of 300 required are at present available. The Committee being aware of the recommendation of the Sanitary Committee as to the opening out of the land extending from South Point to Navy Bay, and seeing that the land at Aberdeen alluded to above as being so fitted for cultivation is included in it, would recommend that it be selected in preference to Port Mouat, as they believe that the place is equally capable of producing like results, and has the additional advantage of combining the carrying out of the cultivation project with the recommendation of the above mentioned Committee relative to the concentrating the convicts, on and opening out of the southern portion of the Island in the immediate vicinity of Head Quarters. High land exists in several directions within an accessible distance of this ground, which it is believed when cleared will eventually prove to be well adapted for localities on which to construct barracks.

6th. The Committee considering the labour which self-supporters have to expend in building their huts and keeping them and the railing round their grounds in repairs, making roads and performing unremunerative works of this kind, are of opinion that the production of vegetables in Government gardens will be more advantageous than on self-supporters land, but provided only it be done on a regular system and under proper strict and responsible supervision as already recommended at 4 annas per diem allowing 2 men per acre, the cost of cultivating each acre of Government gardens will be 182 Rupees per annum, the return to Government at ½ a pice per ℔ issued to convicts will be only 77 Rupees, but it is not considered that the convicts should be charged more—the indirect gain by an improvement in their health will, it is believed, be incalculable. To produce the required quantity of

vegetables, 900 self-supporters would be necessary or 3 men per acre. It is not thought advisable to set apart so many, nor is it believed that men would be found capable of producing the quantity at the rate specified; they would therefore have to be paid at higher rates and the cost to the State would thus be the same or even more.

The Committee do not, however, recommend that the existing number of self-supporting cultivators be reduced, for they consider that they are beneficial by providing fruits and many other products which would not be raised in Government gardens.

The Committee cannot conclude their report without strongly urging the necessity of strict supervision in the case of Government cultivation, as otherwise labour is likely to be frittered away as would appear to be the case in the existing gardens from the result of last year's produce, 134 self-supporters having produced 329,252 lbs, and 88 Government gardeners only 41,786 lbs. of vegetables.

In reference to their opinion recorded above on the 5th point, the Committee would observe that one of their members, Mr. Homfray, dissents so far that he believes Port Mouat to be better adapted for cultivation than Aberdeen for the reason that it is more free from the depredations of cattle, and is, he believes, more healthy, as also that his labour is less likely to be interfered with by the requirements of other Departments.

Extract from letter No. 51, dated 21st July 1866, to CAPTAIN C. P. HILDEBRAND, *Officiating Secretary to the Chief Commissioner, British Burmah.*

Third, a strategical demonstration against the aborigines rendering the southern portion of the Main Island untenable by them.

The Chief Commissioner having reviewed what I have adduced on this head remarks that my reason, which he at first considers to appear sound, carries no weight whatever in the scale as to the project of the immediate occupation of Port Mouat. The Chief Commissioner in para. 6 of his letter notices that one of the reasons urged in my correspondence, then under review, for the immediate occupation of Port Mouat was that by a strategical demonstration against the aborigines, a valuable tract of flat, rich country for the immediate occupation of future settlers would thereby be opened out. He has also urged in para. 8 of his letter, the necessity of reclaiming some of the country around Port Blair, to grow what, above all things, is required, *viz.*, rice, and he recommends that certain swampy villages flooded by salt water creeks should be reclaimed for that purpose. My objection for working upon such localities, I shall detail under another head (see paras. 4, 5, 6, 7), but I wish here to mention that if we are to avail ourselves of the rich flats which are free from swamp and mangrove, that exist to the southward of Port Blair for cereal cultivation, the first step towards such a project appears to me that of securing the cultivators from molestation by the southern aboriginal tribes, and so it is, as I have already frequently urged, that the occupation of Port Mouat would hold these tribes in check.

Such a hold while checking their offensive and predatory habits, ought to have the effect, as I have previously observed, of bringing those who are friendly with us into a more steady contact with an observation of our agricultural proceedings, a result which would benefit the Settlement at large, not only from the assistance that might be eventually derived from them in clearing the more southerly or inland stations in the jungles, the denseness of which, in these Islands, is so remarkable, but also from their being counteracted in their annoyance of those convict cultivators who, having small plots of land more or less at a distance in the interior of the South Andaman, have been frequently much harassed by the aborigines, who are prone to steal the produce that the cultivators have raised with considerable toil, and to wounding them besides when opposed. The convict self-supporting gardeners themselves also, were they assured of a check having been effectually put upon these risks, would feel more confidence in themselves, and be more encouraged to labor to make the allotments given them for cultivation more productive.

No. 78, dated 11th May, 1867.

From—LIEUTENANT G. RANDELL, *Comdg. Detacht. 25 Regt. N. I., Viper Island,*
To—*Secretary to the Chief Commissioner, British Burmah.*

In reply to your letter No. 550, dated 10th May, I have the honor to inform you that the supply of fresh vegetables on this Island being very small, it is very seldom that any of the men of my detachment can procure any from the market here. On Sunday I believe a few vegetables are brought over from other parts of the Settlement, but they are mostly sold to the convicts.

I cannot say whether the price charged here is too high, but I am informed that it is just twice that charged in Moulmein.

I have been in the habit of allowing a sepoy to go now and then to Haddo and Aberdeen for the purpose of purchasing vegetables for my men, and I would suggest that a small supply

might be sent over from either of those places or from Mount Harriet, where I believe there is a fair supply of vegetables. The supply of fish is also very small. Nine seers have been received in one week, but this week only 3 seers have been received for 90 men. I don't think the fishermen do their best to keep us well supplied with fish here. There is no reason that I can see why we should not be as well off in that respect as other places in the Settlement. A great number of the fish that are taken to Chatham and Ross being caught in this part of the Bay.

No. 125, dated 13th May, 1867.

From—LIEUT. A. F. LAUGHTON, *Sub-Assistant Commissary General,*
To—Secretary to the Chief Commissioner, British Burmah.

I have the honor to acknowledge the receipt of your letter No. 563, dated 13th May, relative to the apparent discrepancy in my two statements of vegetables issued since May 1866.

2. The concluding para. of my letter, dated 26th March, to the Superintendent was not intended to show the quantity of vegetables produced on the Settlement, but the quantity issued in distinction to potatoes, onions, &c. There should be a division in the wording before brinjalls, and country vegetables, as it was only these articles amounting to 2,053 lbs. which were produced in the Settlement.

3. 95,233 lbs. of vegetables in the year amounts to only 264 lbs per diem, which is not a very great quantity for the inhabitants of Ross Island. I never purchased in the market if I could help it, considering that did I do so, the convicts would be deprived of this article, so necessary for them, of which it never struck me there was an abundant supply, except once, at the season when cucumbers came in; at this time I noticed numbers of convicts going about eating them raw with eagerness.

I have always supplied what the Bunniahs applied for. If I had a large quantity of yams &c., or even potatoes on hand, I have issued them if they wished for them, and sometimes I have refused their application, not having any to spare.

Doted 11th May, 1867.

From—MR. G. M. DOUGHTY, *Inspector of Police,*
To—Secretary to the Chief Commissioner, British Burmah.

In reply to your letter No. 548, of yesterday's date, I beg most respectfully to state, that the Police are not well supplied with vegetables and fish. I have received many complaints from the Constables on this matter, when visiting the different stations.

I further beg to state that private policemen who get 15 Rupees a month, can afford to pay the rates (for vegetables and fish) as laid down by the Superintendent of Port Blair, but that they could not afford to pay the rates asked by the self-supporting cultivators which is generally one hundred per cent above the market rate.

No. 56, dated 13th May, 1867.

From—Officer Commanding Sappers and Miners,
To—Secretary to the Chief Commissioner, British Burmah.

I have the honor in reply to your letter, marginally noted,* to say that the want of vegetables is much felt by the Sappers here who, in India as a rule, use them in large quantities as they tend greatly to keep them in good health.

I subjoin a price list of vegetables sold in the market here furnished by the Subadar of the company with the price of which such are sold in India; the difference in the two is considerable.

As regards enhancing the supply of vegetables, I see two ways—one for supplying the market generally, the other simply for supplying the company. To ensure the first, the way would be to compel self-supporters to furnish the market with so many pounds of vegetables monthly at a fix price; the 2nd to establish a Sapper garden at Aberdeen, which can be done easily, ground where water is obtainable being allotted, and one convict allowed as a watchman to reside on the spot.

Wednesday is in part a holiday with the men, and on that day digging, fencing in, and planting could be done without entrenching on the days for work, with now and then a party of

---

* Omitted in copy—P. D.

en evening after work to keep the garden in order and for watering; in this way I believe we would supply ourselves, and perhaps, have vegetables over for sale.

A supply of fish daily for the Company can easily be obtained, judging from the success of others who possess boats, and a boat furnished us is all that is required, and which would answer at the same time for perfecting the men in rowing.

Q.

No. 206, dated 27th June, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*

To—*The Secretary to Chief Commissioner, British Burmah.*

I have the honor, as desired in your letter No. 580 of 14th ultimo, to report upon the subject of "clothing," which is the fourth point in that communication to which you call my attention.

2. You convey to me the Chief Commissioner's instructions that I am to state, without delay, whether I have any objections to offer to the proposals of the Committee that recently sat at this Settlement, either as regards quantity, quality, or cost of convict clothing, and generally, as to what the Committee recommended as regards the advisability of insisting on prisoners wearing Government clothing, to which I beg to reply as under—

I.—As regards quantity.

The annual supply of clothing allowed by Government at present is as under:—

Male laboring Convicts, ...	3 Koortahs and 3 Dhotees.
Female do. do.	3 ,, and 3 Sarees.
Male do. do. of the 9th or Marine Division	1 Extra Koortah and 1 "Topee" made of serge, are sanctioned.

Besides the above, two blankets to each male and female convict are allowed.*

* These blankets were first issued in 1864. They are now mostly worn out. No time was fixed by Government as to how long it was expected they were to last. This point will be noticed further on.

Annexures marked A, B, C, comprehend a description of the above clothing, and the Government sanction thereto.

3. Referring to paragraph 19 of the Proceedings of the Committee assembled at Port Blair on the 3rd of May last,† by order of the Chief Commissioner, I observe the Medical Officers composing it coincide in my views, and consider that all laboring convicts should receive three suits of clothing and one blanket yearly. The Committee have recommended one blanket, because they remark that the convicts are now being provided with a bed "made of gunny bags stuffed with coir, which is prepared at the hospitals by convalescent prisoners."

† To consider certain points connected with the sanitary and general progress of the Settlement.

Here the Committee are in error. No beds are made by convalescent convicts for use of convict barrack, but some stuffed beds have been made on my recommendation by these prisoners for hospital use.

4. Since I have been Superintendent I have utilized the Commissariat empty rice bags by stitching pairs to make dhurrees for the convicts in barracks to sleep upon. These bags can only be got when the Commissariat can spare them. Assuming, however, that the convicts will be eventually so supplied, I beg to state that I recommend that they be provided with one blanket every two years, and one common hair cumblee (rug) yearly.

5. I have found that the (rice bag) bedding is in the monsoons very absorbent of damp, but that the "cumblee" spread on the dhurree averts much of the risk of chill and fever, and has been found very useful to the convicts as a covering when out at labor in wet weather. These cumblees could be got for half the cost of the second sanctioned blanket, *viz.*, at 12 to 14 annas each.

II.—As regards quality.

6. I beg to draw attention to copy of letter, to my address, attached, marked D, from late Surgeon Major D. T. Morton, Senior Medical Officer of this Settlement, who, disapproving of the thin texture and scanty covering of the clothing formerly supplied to convicts here, strongly recommended a more substantial material for clothing,—a pattern of which was submitted to Government and approved of.

7. I had great difficulty in procuring cloth of this description, save at an expense far beyond what I could venture to incur. After much enquiry, however, I procured "punjum" cloth from Madras, of a stout and tolerably durable texture, and a somewhat similar material ("dosootee") from Calcutta, and these have now been in use for clothing some time.

III.—As regards cost.

8. The average cost of the above cloth‡ is annas 5-6 per yard. One suit for a male convict will cost Re. 1-11-6.§

9[1]. For female convicts a somewhat thinner cloth‖ is made use of. One suit for a female convict costs Re. 1-5-1.¶

‡ It takes 1½ yard to make a koortah, and 3½ yards for a dhotee, which, in both cases, is the least quantity for such clothes that can be properly recommended.

			Rs.	A.	P.
§ Koortah	... 1½ yard,	at As. 5-6 =	0	8	3
Dhotee	.. 3½ yards,	,, ,, 5-6 =	1	3	3
		Total ...	1	11	6

‖ This average at 3 annas 3 pie per yard; 1½ yard is allowed for koortah, and 5 yards for saree

			Rs.	A.	P.
¶ Koortah	. 1½ yard,	at As. 3-3 =	0	4	10
Saree	... 5 yards,	,, ,, 3-3 =	1	0	3
		Total ..	1	5	1

10. The Government having desired that the convicts should be uniformly clothed according to their occupation, some extra cost is necessarily incurred for the Convict Police, the Marine Division, and Steamer *Diana's* crew; the cost per suit issued to each is as under—

Convict Police.

				Rs.	A.	P.
1 Grey cloth jacket...$1\frac{5}{16}$ yards,	at Rs. 21 2 10	...	...	4	2	4
1 Black cotton trouser...$2\frac{1}{2}$ „	at „ 0 6 9	...	...	1	0	10
1 Red cotton turban...2 „	at „ 0 6 1	...	...	0	12	2
		Total	...	5	15	4

Marine Division.

2 Serge koortahs...$1\frac{1}{2}$ yard,	at Rs. 1 6 0 ...	...	...	4	2	0
1 „ cap, ... $\frac{1}{4}$ „	at „ 0 1 6 ...	...	...	0	5	6
2 Blue koortahs ... $2\frac{3}{4}$ yards,	at „ 0 13 4 ...	...	...	4	9	4
3 „ dhotees ... $3\frac{1}{2}$ „	at „ 0 5 6 ...	...	...	3	9	9
		Total	...	12	10	7

Steamer Diana's Crew.

3 Blue cotton koortahs...$2\frac{3}{4}$ yards,	at as. 13 6	...	...	6	15	4
3 „ trousers ...$2\frac{1}{2}$ „	at „ 13 6	...	...	6	5	3
1 „ turban ...2 „	at „ 11 4	...	...	1	6	8
		Total	...	14	11	3

In the above the cost of class chevrons, numbers, and badges, is not included.

Dr. Morton recommended, in which opinion I coincided, that the convict koortah should be made double on the chest, so as to afford somewhat additional warmth round the stomach and loins,—the dhotee was adopted instead of jungiahs for the same reason.

11. Suits of all the established pattern for male and female convicts are herewith separately forwarded for the inspection of the Chief Commissioner by this Mail.

12. Having now afforded information as to existing quantity, quality, and cost of convict clothing, I beg to state that I have consulted with the Senior Medical Officer, with a view to the reduction, if possible, of cost to Government of convict clothing. To this matter Dr. Rean and myself have given our very careful attention, and we are of opinion that it will be found that three suits a year are absolutely necessary. In the wear and tear of such clothing worn only in a Jail where prisoners can obtain shelter from the weather probably two suits may be sufficient; but this is very different from the rough usage to which the convict clothing is subject in Port Blair, where it is worn in all weathers and at the hardest labor,—such as carrying or dragging iron, stone, timber, quarrying, and earth-work, clearing jungles, foresting, discharging cargo, ballasting and coaling, and afloat.

13. I now propose a scale, in which Dr. Rean coincides, of annual issue of clothing, which, while due regard is given to those considerations which point out that extra covering is necessary to the convicts in this climate, is also prepared with close economy.

14. It has been recommended by the Committee that clothing of the material and pattern such as is used in the Rangoon Jails be introduced here for convicts.

15. I respectfully submit that it was impossible for the Committee, all strangers to this Settlement, and holding their proceedings as they did in the height of an unusual hot season, to understand at such a time what where the actual clothing requirements of the convicts in Port Blair.

16. Dr. Rean and myself have, however, approved of the Rangoon Jail koortah, though more expensive than that of Port Blair, for it is of thicker material and therefore warmer. We consider the present Port Blair dhotee preferable as warmer about the stomach and loins, and more adapted to the habits of the men than the jungiahs. We, therefore, wish to retain the dhotees; but, as the koortahs will be more expensive, it is proposed to make the experiment of issuing but two instead of three dhotees, sarees and putzoes, annually,

so as still, if possible, to keep down cost to the State. Below is given the proposed annual allowance and cost of convict clothing:—

Number of convicts.	Description of convicts.	Number and description of clothing to be issued to the convicts.	Number of yards for making each description of clothes.	Cost. Per yard. Rs. As. P.	Per piece. Rs. As. P.	Per set. Rs. As. P.	Per convict. Rs. As. P.	Total cost. Rs. As. P.

6,000								
100	Convict Police .	1 Grey cloth jacket 1½ 1 Black cotton trouser 2¾ 1 Red cotton turban 2		2 12 10 0 5 6 0 5 2	3 13 0 1 0 0 0 12 4	3 13 0 †1 0 6 0 12 4	5 9 10	561 7 4
	And—Half cost of one blanket to be issued every two years to each convict, at Rupee 1-12 each							5,250 0 0
	Cost of one cumblee to be issued annually to each convict ,, ,, 0-12 ,, ...							4,500 0 0
	,, 30 punishment suits . ... Rs. 3- 0 ,, ...							90 0 0
	,, making belts, badges, and numbers							320 0 0
	Miscellaneous expenses for needles, scissors, &c.							80 0 0
							Total ...	35,949 8 4

17. I have taken much pains to make all convict clothing suitable and inexpensive. The material for the Convict Police jacket, which is disapproved of by the Committee, (who perhaps forget that these men have out-door sentry duty‡ in all weathers, and are liable to be more exposed perhaps, than any other convicts,) was procured§ at a moderate cost from the Army Clothing Agency at Calcutta. I ascertained that a continued supply of this material could be obtained on the same terms. Dr. Rean does not now object to this coat.

‡ On wharfs and roads; on godowns and stores; on patrols, &c.

§ From Captain Turnbull, Superintendent, Army Clothing Agency, Calcutta.

18. Assuming the number of convicts to be clothed during the ensuing year to be 6,000, the total cost to Government will be Rs. 35,949-8-4, or at a cost of Rs. 5-12-8 per convict per annum, excluding the Convict Police and the crew of Steamer *Diana*, which is annas 2-8 per man more than the Committee's scale, or, on the whole, the cost will be Rs. 5-15-8 per man.

19. In the above calculation 1,000 gangsmen are not included, who I formerly recommended should be required to provide their own clothing on an approved pattern. These are the men that probably the Committee refer to in paragraph 22 of their Report, and it should be here added that I do not require convicts employed as private servants to wear convict clothing, except when attending musters, inspections, &c. All other convicts, except self-supporters, are invariably required to appear in the Government clothing provided for them.

20. There are besides a number of convicts to be seen here wearing clothes of different patterns, supplied to them in the Jails they come from; this clothing I allow to be worn out.

21. In conclusion, and in view, therefore, of the whole question of clothing, I beg to state that I have, in accordance with the directions of Government from my taking charge as Superintendent of this Settlement, clothed all convicts to the best of my judgment suitably to the climate, their occupation, &c; and that from my experience of three years and a half, I having observed, save as excepted above in consultation with the Senior Medical Officer, no grounds for changing my opinion as regards quantity, quality, and make of the clothing for convicts; I beg to solicit that what has now been established may be finally approved.

* This price can be reduced.

† Excluding cost of dyeing.

A.

No. 03078A, dated Rangoon, the 6th September, 1864.

From—MAJOR H. N. DAVIES, *Secy. to Chief Commr., British Burmah.*

To—*The Commissioner, Tenasserim Division, Moulmein.*

I have the honor, by direction of the Chief Commissioner, to acknowledge your letter No 421A, of 25th August, forwarding Major Ford's letter No. 23 of 27th July, on the subject of clothing.

2. The Chief Commissioner understands Major Ford recommends for each prisoner two light suits of clothing, and one serge jumper or loose jacket,—total three suits annually; and for the boat's crew one light suit and two serge jumpers annually. Should Dr. Morton recommend the above scale, the Chief Commissioner considers it will be proper to allow the above complement of clothing.

3. Regarding blankets, it is presumed Major Ford has already taken steps to comply with Sir Robert Napier's instructions.

No. 57, dated 8th September, 1864.

Endorsed by COLONEL A. FYTCHE, *Commissioner, Tenasserim Division.*

Copy forwarded to the Superintendent of Port Blair for his information and guidance.

B.

No. 04232A, dated Rangoon, 19th November, 1864.

From—MAJOR H. NELSON DAVIES, *Secy. to Chief Commr., British Burmah,*

To—*The Superintendent, Port Blair.*

I have the honor, by direction of the Chief Commissioner, to acknowledge your No. 75, dated 1st October last, on the subject of clothing of convicts. In reply, I am desired to state that the Chief Commissioner is desirous of sanctioning whatever is really necessary, but the scale of clothing proposed by you is in excess, the Chief Commissioner believes, of what is allowed for Transmarine convicts at Moulmein. He concludes, however, that there are good sanitary reasons for allowing an ordinary laboring convict three dhootees, besides koortahs, some jumpers and blankets. Still, as by the Steamer *Arracan*, the Deputy Inspector General of Hospitals, Dr. Smith, proceeds to inspect the hospitals at the Andamans, the Chief Commissioner desires you will submit the subject of clothing for that Officer's consideration, and report further accordingly.

C.

No. 21, dated 9th December, 1864.

From—MAJOR B. FORD, *Superintendent, Port Blair,*

To—*The Secretary to Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 04232A, dated 19th ultimo, in which, by the direction of the Chief Commissioner, and referring to my letter to your address, No. 75 of 1st October last, on the subject of clothing, he desires that I will submit that subject to the consideration of the Deputy Inspector General of Hospitals, Dr. Smith, on his visit here, and report further accordingly.

2. I now beg to say that I have laid the whole matter of convict clothing before Dr. Smith when recently here, and he authorizes me to say that he quite approves of my scale of clothing, and considers, for the reasons that I have already adduced, that they could not do with less.

3. I beg to add that, in submitting the scale already before the Chief Commissioner, I prepared it with every care and in consultation with the Medical Officer of this Settlement. You mention that the Chief Commissioner believes that my scale is in excess of what is allowed for Transmarine convicts at Moulmein, on which I would beg respectfully to remind you, that, though my scale may be so, it must be borne in mind that the climate of Port Blair is a much more temperate one than that of Moulmein; that there is a great deal more rain here than there,—the fall being equal to that of Penang; that we live in a much moister atmosphere, also causing considerable perspiration, even in light exercise; and the works that convicts have to do here is undoubtedly of a rougher kind than any falling to labor of convicts in a town jail. These reasons, I think, will be sufficient to show that wear and tear of clothes must be considerable; that a suit on a man, and a dry suit to change with, and one more suit to issue when one of the first is worn out, is not too much for a year's work.

4. The two blankets per man in so damp a climate, where it rains two-thirds of the year, are, in the opinion of the Medical Officer, as well as myself, absolutely necessary, as is also the jumper for wear during the more inclement portions of the wet season, when the convicts are often much exposed.

D.

Dated 11th July, 1867.

From—SURGEON MAJOR D. T. MORTON, M.D., F.R.C.S., *Senior Medical Officer Port Blair,*
To—The Superintendent, Port Blair.

I have the honor to bring to your notice that, having inspected the clothing supplied by the Alipore Jail for the use of the convicts in this Settlement, I am decidedly of opinion that, independently of the jackets being a great deal too small for the male prisoners, the cloth of which they are made is not at all adapted for this variable climate,—the texture being too light and not affording the warmth required, the convicts being all employed in out-door work, I have, therefore, the honor to propose that clothing made of more substantial material be supplied to the prisoners, and of the kind of which I enclose a muster. I would also strongly recommend that the jackets be open in front, and so made as to fold double on the chest with sleeves simply to the elbows for the working prisoners, but extending down to the wrist for the sick in hospital.

E.

No. 204, dated 27th June, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*
To—The Secretary to Chief Commissioner, British Burmah.

I have the honor to report upon the third point, especially brought to my notice, as one of importance, in your letter No. 580 of the 14th ultimo, *viz.*:—

Water supply.

The water supply on the Islands of Ross, Chatham, and Viper.

2. I take this opportunity of drawing attention to the subjoined copies of correspondence on this subject:—

Letter No. 81 of the 27th August 1866, from the Superintendent of Port Blair, to Captain C. P. Hildebrand, Officiating Secretary to the Chief Commissioner of British Burmah.

Memorandum No. 601 of the 26th November 1866, from Captain Hildebrand, in reply.

No. 317 of the 27th November 1866, from the Executive Engineer at Port Blair, to the Superintendent.

No. 3047 of the 27th November 1866, from the Superintendent, in reply.

From which it will be observed that this matter had my special attention nine months ago, on which the subject was referred by the Chief Commissioner to the Chief Engineer of British Burmah, and a project was called for in that Department from the late Executive Engineer of this Settlement, F. C. Marshall, Esq. I brought these facts to your notice in my Memorandum No. 232 of the 20th April for the information of the Chief Commissioner.

3. Referring to the Report of the Committee that recently sat at Port Blair on sanitary and other matters, in their paragraph 10, it is remarked that "the water supply on Ross, as well as on all island stations, is scanty," and "but for an unexpected fall of rain in the middle of April, the island would have *suffered severely* from the want of water." I am at a loss to know how the Committee came to this conclusion; for the Chief Commissioner will have observed from my Reports that I had been deepening tanks and old wells, and digging new ones on Ross Island. These were carefully looked after, and had quite enough water in them (at least for the cooking and drinking purposes of all classes) till the middle of May, before which time showers fall here every year, which add to the supply. There can be no doubt, however, but that (though I had been enabled to procure water sufficient for the season) Ross Island should be beyond any risk in this respect; and, though we have a condenser, it would not do to depend upon it; and I would therefore beg again to urge that the Engineer Department may be instructed to take measures, before next hot season, for securing to Ross Island a large and more permanent supply of water.

4. With regard to Chatham Island, I can confidently state, for the Chief Commissioner's information, that there was quite enough water for the requirements of the inhabitants. There was one large well alone, which had just been completed, that was yielding an abundant supply of water, besides five others,—all giving a fair quantity. Dr. Gamack himself has reported to me that there was "no scarcity." On Viper Island there were two tanks and nine wells, all yielding water; and Lieutenant Randell, Commanding there, and the Overseer, have stated to me that "they had no want of water."

I venture, in justice to myself, to trouble the Chief Commissioner with these particulars, because, on the Report of the Committee, who did not seek any information from myself, or the above Officers, in this matter, it might be inferred that I had not given these matters

my attention; whereas, as soon as I found that no help was to be expected from the Executive Engineer this year, I made the matter of water supply my constant and personal care, and with largely increased numbers in convicts provided a much better supply than that of the previous year.

5. You mention that one method of preserving a supply of water is by planting numerous shrubs and trees. I have consequently to report, for the Chief Commissioner's information, that I have had a number of young trees brought from the jungles, such as wild jack, wild nutmeg, gongo, peepul, "kanazo-thee," &c., and planted about the slopes of Ross, Chatham, and Viper Islands. The following is the total number of trees planted out at each during the past month up to date:—

Ross Island	...	...	...	...	...	305 trees.
Chatham Island	...	...	...	...	...	238 ,,
Viper Island	...	...	...	...	...	151 ,,

These consist principally of the trees recommended to be planted by the Committee (as also Dr. Gamack). *See* conclusions of paragraphs 9 and 38 of their Report.

No. 81, dated 27th August, 1866.

From—Lieut. Colonel B. Ford, *Superintendent, Port Blair,*

To—The Officiating Secretary to Chief Commissioner, British Burmah.

I have the honor to acknowledge the receipt of your docket No. 338 of 30th July last, forwarding copy of letter No. 2843 of 17th July 1866, from the Under Secretary to the Government of India, to the address of the Chief Commissioner of British Burmah, together with a printed copy of my Report on the affairs of this Settlement for April 1866, and calling for a Report upon the scarcity of water as therein remarked upon.

2. In reply, I beg to state for the information of His Excellency the Governor General in Council, that the scarcity of water under consideration may be primarily attributed to the early exhaustion of the supply collected in our tanks during the rainy season, particularly on Ross and Chatham Islands,—the north-east monsoon having closed unusually early, and no rain having fallen in January last, in which month it is customary to expect that there may be a rain-fall sufficient to fill up the tanks, which supply, with that which has hitherto been obtained from wells, has been considered sufficient to last till the commencement of the south-west monsoon. The scarcity has occurred in previous hot seasons before, although not to (save on one occasion) such an extent; but the demand last year has been far greater than any previous year, consequent on the great increase in the number of convicts, and the proportionate supply of live stock for their use. All labor that could possibly be spared, consistent with the heavy demand of the Public Works Department, was provided to cleanse and deepen the old, or to sink new wells. But again, as water is obtained generally at a less depth than 40 feet, it follows that, unless wells are lined with masonry, the same fall or crumble in, and become choked and useless; and so pressing were the Executive Engineer's demands last cold season for masons, and his requirements for all the bricks he could make, that, with the exception of lining with brick for five wells, no more could be done. Five other wells were lined with rubble stone in clay for present use, and some others were wood cased; but these are not calculated to last long. On the mainland enough water can always be found by digging; and it is solicited that the Executive Engineer may this year be instructed to give his attention to the formation of small bunds across such natural positions, as well as thereby form tanks at Aberdeen and the north shore (where, unfortunately, a new bund, formed by the Sub-Assistant Commissary General has just carried away) for cattle supply; and that a sufficient number of wells (to be brick lined) may be sunk at the different stations, as will secure the Settlement next hot season from the scarcity of water that prevailed last year.

3. There are no signs, so far as I am able to judge, if the above application be complied with, that the Settlement is likely to suffer from any future scarcity of water.

No. 951-121, dated 22nd November, 1866.

Memo. from—Major W. S. Oliphant, R. E., *Secretary to Chief Commissioner, British Burmah, in the Public Works Department,*

To—The Secretary to Chief Commissioner, British Burmah.

With reference to Major Ford's letter No. 121, dated 15th ultimo, and annexure, herewith returned, the undersigned has the honor to state that orders on the supply of water to the Port Blair Settlement were issued to the Executive Engineer on the 17th October 1866.

No. 601 W, dated the 26th November, 1866.

Endorsed by the Offg. Secy. to the Chief Commr. of British Burmah.

Copy forwarded to Major Ford, Superintendent of Port Blair, for information, with reference to his letter No. 121, dated 15th October last.

No. 317, dated 27th November, 1866.

From—F. C. MARSHALL, Esq., *Executive Engineer, Port Blair Division,*
To—The Superintendent, Port Blair.

I have the honor to forward copy of Chief Engineer's Proceedings, No. 157 of the 17th October last, received by the last Mail; and, in accordance therewith, will be obliged by your appointing a day for deciding the points therein alluded to.

No. 157, dated 17th October, 1866.

Chief Engineer's Proceedings, Port Blair.

Supply of water to Port Blair Settlement.—*Vide* Superintendent's letter, dated 27th August 1866.

Copy of letter forwarded to the Executive Engineer, in order that he may arrange with the Superintendent for the use of convict labor and material for the commencement of all necessary wells and tanks required for the supply of fresh water; and he is requested to enter any money allotment required for the completion of such works in the Budge for 1867-68.

A report and general scheme of operation, with detailed estimate, should be submitted as soon as possible.

(Signed) W. W. CULCHETT,
Exe. Engr., for Asstt. Chief Engr., British Burmah.

No. 3047, dated 27th November, 1866.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*
To—The Executive Engineer, Port Blair Division.

In reply to your letter No. 317 of this day's date, I have the honor to inform you that I shall be prepared to enter upon the matter of the supply of water to this Settlement referred to by you, at noon, to-morrow, if convenient to you to meet me at my quarters.

No. 345, dated 23rd April, 1867.

Memo. from—MAJOR H. NELSON DAVIES, *Secy. to Chief Commr., British Burmah,*
To—The Senior Medical Officer and President, Sanitary Committee, Port Blair.

The undersigned has the honor, with reference to his No. 329, to state that he has this morning inspected nearly all the wells on Ross Island (some nine or ten), but in only one or two is there a good supply of water. The Bhistees say, after the morning's supply is taken out, the majority of wells are empty, and the undersigned saw convicts endeavoring to obtain a supply from the drippings off the rocks. One man stated, until the recent rains, the water the convicts had to use was unfit for "meat and drink,"—so impure was it. The water supply is a very serious matter; it affects not only Ross, but Chatham and Viper; and generally the high localities, which are stations; and it may be necessary to limit the number of barracks for the accommodation of prisoners with reference to the water supply. It is evident the supply must be limited, and digging more wells will not remedy the evil; no pains have been taken to replace the jungle clearings by planting wholesome trees; and it is submitted, for the consideration of the Committee, whether the plantings of shrubs and trees should not be set about vigorously as a partial, though late, remedy for an increasing evil of great magnitude.

No. 386, dated 26th April, 1867.

From—MAJOR H. NELSON DAVIES, *Secretary to Chief Commr., British Burmah,*
To—Mr. Apothecary J. NORMAN, *Port Blair.*

I have the honor to state that from many of the convicts I have heard complaints of the scarcity of water.

As you reside in the midst of the men's barracks, and your profession brings you in close contact with many of them, I request you will favor me with a true statement of the case, and state whether the men have had cause for complaint or not.

No. 831, dated 27th April, 1867.

From—Mr. 2nd Apothecary J. NORMAN, *Madras Medical Establishment,*
To—The Secretary to Chief Commissioner, Port Blair.

With reference to your Memorandum No. 386 of yesterday's date, on the subject of certain complaints made by convicts about the scarcity of water on Ross Island during the months of February and March 1867, I beg to state, for your information, that the men had just cause to complain,—the supply of water during the above-mentioned months being very scarce; all the wells situated at the south end of this island having become dry, and the demand being greater than what could be supplied from the several wells and tanks situated here.

I beg to append copy of a letter from the Senior Medical Officer, to the address of the Superintendent of Port Blair, and reply from the Executive Engineer, on this subject.

No. 764, dated 26th March, 1867.

*From—*SURGEON A. COWIE, *Senior Medical Officer, Port Blair,*
To—The Superintendent, Port Blair.

I have the honor to bring to your notice that the fresh water supply of this island is becoming very scarce. What still remains in the wells and tanks now in use should be husbanded as much as possible, and used chiefly for drinking purposes.

At present it would appear that we rely for our yearly supply of fresh water mainly on the rain-fall of each south-west monsoon.

It is advisable, therefore, to have sufficient reservoirs to store a quantity of water to last at least 12 months, in anticipation of a possible drought some year; especially is this precaution necessary in this small island, with a rapidly increasing population.

The present time is most favorable for deepening those sources of supply which are in many instances nearly quite dry, and I would suggest that the carrying out of this most essential work be attended to at once.

Trusting that the views which I have expressed on this subject will meet with your approval, I shall be only too happy to lend my experience in the construction of additional wells and tanks to the Department whose direction it is to undertake the duty.

S.

No. 210, dated 25th June, 1867.

*From—*LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*
To—The Secretary to Chief Commissioner, British Burmah.

Forest Department.

I have the honor to acknowledge the receipt of your letter No. 479 of the 4th ultimo, subject as per margin, and with reference to the 1st para. thereof beg to forward enclosed an extract from my Administration Report on the forest operations of this Settlement for 1865-66.

2. Referring to para. 2 of your letter, I beg to state, for the Chief Commissioner's information that there are no Forest Department records in the Settlement for the year 1863. Captain Heath, the late Executive Commissariat Officer, who first took charge of the Forest Department, commenced his records with 1864, in which and succeeding years the following operations were carried out:—

	Trees numbered and girdled.	Trees felled.	Trees converted into posts or timber.
1864	591	74	35
1865	558	69	30
1866	330	47	26
1867	671	32	28

3. The number of trees now standing in the forest about Port Blair, which have been girdled is 1,526, and these may be seen in the jungles adjacent to Aberdeen.

4. The following Statement shows the cash outlay and estimated cost in material and labor supplied to the Forest Department each year :—

1864.			1865.			1866.			1867. Up to 1st May 1867.			Remarks.

5. In reply to the query contained in your para. 5 as to whether the Forest operations under the Forest Officer has been of any service in keeping the Steam Saw Mill going, I have the honor to state that the experimental Establishment was too small to undertake this supply, and that the timber for that mill has hitherto been supplied by prisoners worked under the Executive Engineer's orders, in the jungles of Aberdeen, close to Chatham Island, where the Steam Saw Mill stands.

6. No logs have been furnished by the Forest Department to the Saw Mill. Supplies have been offered, but the mill has been otherwise kept fully going with other local and imported timber.

7. Information as to the quantity of jungle timber cut up in the Saw Mill, and the number of prisoners worked under the orders of the Executive Engineer, has been furnished by Lieutenant Cumming, R. E., in his letter No. 107 of the 4th June, copy attached, sending two Statements marked A and B, from which it will be perceived that 25,058 cubic feet of timber, 1,14,955 running feet of boards, and 6,927 logs into shingles were cut during the last three and half years. The number of convicts employed on that work was 77,637.

8. With reference to the existing demands for labor for Public Works Department, Commissariat, &c., on Aberdeen, to which vicinity the forest operations are for the present experimentally confined, as calculated against the strength of the convicts there located, not more than the present number of convicts (see margin) can be furnished. If considered against the strength of the Settlement and the demand for labor generally, 100 men could be supplied.

Head Forester	...	1
Assistant ditto	...	1
Sawyers	...	6
Coolies ...	...	6
English Writer	...	1
Total	...	15

9. During the dry season, labor in the jungles does not much affect the prisoners' health. If sent into the interior of the jungle during the rains, they would probably suffer much from fevers and ulcers. In the wet season they might be employed on the outskirts.

10. Having referred your paras. 10, 11, 12, 13, and 14 to Captain DeKayne, Commanding Sappers and Miners, in charge of the Forest Department, I beg to quote his replies to the same as shown against each.

10. Can iron wood sleepers be obtained, and in what quantity could they be brought to the water's edge; a spot suitable for shipment, and at what cost, valuing convict labor employed at 4 annas per diem for each man throughout the operations, and including a fair rate of the higher paid Forest Establishment?

11. By what date could you have 500 iron wood sleepers ready at the water's edge, and what Establishment would you require to procure them; state dimensions, and at what rate could you afford to sell them, so as to cover all and every expense?

"The answers to these questions must be left "until the weather permits of a more careful "survey of the jungle being made. The 'Pyn-"gadoe' (which, it is presumed, is meant as iron "wood) does not appear to exist in any num-"ber in the Aberdeen jungle. Unless procur-"ablein quantity, and unless traces are first "run in various directions, timber cannot pos-"sibly be brought in sufficient quantity to make "their removal profitable. I would in my pro-"fessional opinion strongly recommend that a "portable Steam Saw Mill with tramway be "furnished to the Forest Department, the out-"lay for which, I feel certain, would be recovered "in a very short time, and the quantity of cut "timber procurable of all kinds as equally "adapted for sleepers as 'Pyngadoe' and "'Andaman Wood,' greater than ever could be "procured, dragged in, and cut up in the pre-"sent manner."

With reference to the above, *vide* Extract from my Memorandum to Government, dated Calcutta, the 8th February 1866, copy attached.

12. When can you have 50 pieces of Bullet wood ready fit for gun stocks?

13. State, in your opinion, in how many years 100 men employed daily could make a road, say 20 feet wide, through the three Islands from north and south, with say a dozen of cross roads to the sea on either side, and state what advantage the work would be when done?

14. Finally, please state the estimated cost of such a work at the probable real cost of prisoners' labor here, say 20 Rupees a month.

"With 25 coolies employed daily, 50 pieces of Bullet wood may be procured in six weeks.

"It would be unprecedented to attempt to "calculate the cost of making a road even "through an open country prior to running a "'trace,' much more so through dense jungle, "and I have not therefore presumed to attempt "it. The estimated cost, the time and labor "required to complete a trace of the three "Islands from north to south with six cross "roads, would, in my opinion, be thus :—

"100 men working daily—

"Time 757 days.

"Labor 75,700, actual labor independent of "supervision cost Rs. 49,566-10-8, to which may "be added safely, I think, from 60 to 80 per cent. "both on labor and expense, such as camp equi-"page, medicines, rations, rum, &c., &c.

R. P. DEKAYNE, *Captain,*
In charge Forest Dept., Port Blair.

11. In conclusion I beg to state that the advantages of opening roads through the three islands are so obvious that it seems hardly necessary to state them. But as the question has been put, it may be mentioned that until roads are cut into the interior, it is evident that such natural productions as are of commercial value will never be brought to the coast for exportation for the benefit of Government, nor by consequence, speaking locally, will the Settlement even benefit by such productions. Thus, therefore, both inland and foreign commerce will profit by the opening of roads. A judicious and high level line being chosen, the future surveys of the islands will be greatly facilitated; by the branch roads from the mainland, hill sanitaria, rich cultivable valleys, and the various ports will be reached; much development as to mineral produce must follow; communication will be opened with the Cocos or other distant Settlements, which in bad weather may be hardly accessible by sea. A line of telegraph communication will be opened, which ere long will be needful between Table Island and Port Blair; aid to the ship-wrecked will be afforded; the aborigines will be brought under subjection, and escapes of convicts largely reduced. Many more reasons might be added to the above, but I think what I have stated will suffice to show some solid advantages to be derived by the opening out of the proposed roads.

Extract from Report on the Administration of the Bengal Settlement of Port Blair, Andaman Islands, for 1865-66.

SECTION XVII.—FORESTS.

Forest Establishment.

139. In the Proceedings of His Excellency the Governor General of India in Council, dated Simla, the 22nd of July 1865, he was pleased to sanction an allowance of Rs. 100 per mensem, for an Officer to superintend the necessary operations of the small experimental Forest Department, that in the last year's Report it was mentioned had been initiated with a view to obtaining a more intimate knowledge of, and to protect and develope the timber resources of these islands. The allowance was sanctioned for one year. The submission of a Report being ordered as to the working of a plan after the expiration of that period, the Forest Department, during the year, under report has been under the charge of the following Officers :—

(1). Lieutenant St. John, Her Majesty's 60th Royal Rifles who, on leaving the Settlement, was relieved on 1st of November 1865 by

(2). Lieutenant Foord, Madras Sappers and Miners, who, on his departure from this Settlement on the 14th April 1866, was succeeded by

(3). Lieutenant Mathias, of the same Corps.

The following has been the Forest Establishment for the year :—

1 Eurasian prisoner Overseer in charge.
1 Head Forester.
2 Assistant Foresters.
6 Sawyers.
11 Coolies.

Trees girdled and felled.

140. During the year 675 trees have been girdled, the whole of which number have been branded and registered; 89 seasoned trees have been felled.

Names and varieties of trees.

141. The following Statement shows the different varieties and percentage of trees comprehended in the above operations :—

Statement showing the different varieties and percentage of trees girdled, branded, and registered, and felled during the year 1865-66.

Most of the above timbers are valuable either for ship, house building, or ordnance requirements, for railway sleepers, furniture, or other house-hold purposes.

Quantity of timber used for local purposes.

142. 2,686-87 cubic feet of the above have been expended on useful local purposes. About 33,261 maunds of fire wood were supplied for the Steam Saw Mill, Steamer *Diana*, Commissariat, and Hospital supplies.

Forest operations confined to vicinity of Port Blair.

143. Care has been taken in felling seasoned trees to select such as were most easy of access and transport to the saw pits; but in consequence of the sickness of two elephants, partly employed for this Department during the greater part of the season in which forest operations can be carried on, the labor of dragging the logs out of the forests was a matter of great difficulty, while to send Burmans to the jungles to saw timber on the spot where it was felled, was a matter of considerable risk, not only as regards sickness, but escape. A good deal of timber was necessarily cut into small lengths before it could be removed.

Utilisation of the forests necessary.

144. It is evidently advisable to utilise the valuable woods of these islands as far as possible, both for local requirements, as well as hereafter to extend operations for the export of timber, and while with the assistance of more elephants to drag timber to the water side which would be floated to "Chatham Island" for conversion by the Steam Saw Mill there for the former purpose, an economic and speedy means would be found towards meeting the market demands of the latter, (especially for cutting Railway sleepers, of which from 200 to 250 could be cut up per day), by the introduction into this Settlement of portable steam engines of about 10 or 12 horse-power, mounted on strong carriage wheels, (and supplied with portable saw benches), which from their light construction could be pushed into the forests up to the very spots where groups of seasoned felled trees are ready to be cut up. The portable machines also would be found very useful in cutting up timber for local requirements on different localities in the interior, from whence the distance would be too great to drag logs for floating to the Saw Mill at "Chatham Island."

Visit to the Settlement of Conservator of Forests, British Burmah.

145. In the Resolution of Government quoted above, in Section 139, the Governor General in Council was also pleased to direct the advisability of deputing the Officiating Conservator of Forests, British Burmah, to visit Port Blair and consult with the Superintendent with a view to the better utilisation of the Andaman Forests. Mr. H. Leeds visited the Settlement in April 1866, and finding the forests to contain many woods valuable for a variety of purposes, and in view of the desirability of systematising a Timber Depôt both for the supply of the Steam Saw Mills at Chatham Island and for export, proceeded, in concert with the Superintendent, to enter into the subject of forest management, which has resulted in the submission, to Government, by the Conservator of Forests, of a scheme for the formation of a Forest Department with a fixed Establishment under a Departmental Officer, which is now under consideration.

Orders for preparation of specimens.

146. In the month of June 1865, consequent on the orders of Her Majesty's Secretary of State for India, instructions were received for the preparation of specimens of the more valuable kind of timber procurable in the forests of Port Blair. Of these 100 have been prepared, and at the close of the official year were in course of preparation and labelling. Each specimen was prepared of the full breadth of the centre of the trees, so as to show heart and sap wood with the bark, a list of which is given in the Appendix marked E.

No. 107, dated 4th June, 1867.

From—LIEUTENANT W. G. CUMMING, R. E., *Executive Engineer, Port Blair Division,*

To—The Superintendent, Port Blair.

With reference to your letter No. 40 EE, of the 25th ultimo, I have the honor to enclose two Statements, one showing the number of convicts employed in cutting jungle timber, loading, and conveying it to the Saw Mill, as well as in cutting it up, and the other the quantity of jungle timber cut up in the Saw Mill and expended on works, both the Statements dating from November 1863 and ending April 1867.

Owing to the imperfect manner in which the accounts of former years were rendered, the precise number of convicts employed and the quantity of jungle timber cut up in the Saw Mill cannot be ascertained; what is here furnished may be taken as an approximate account of the Saw Mill operations for the last three and half years.

Statement showing the Number of Convicts employed on Saw Mill in Port Blair Division, Public Works Department, for cutting and carrying Jungle Timber, from November 1863 *to April* 1867.

W. G. CUMMING, Lieut., R. E.,
Executive Engineer.

Extract from a Memorandum addressed by the Superintendent of Port Blair to the Government of India, in the Home Department, dated 8th February 1867.

I beg to draw attention to the large resources for the supply of timber that exist in, and close about, Port Blair. No one now in the Settlement understands Botany. Were a Subordinate Officer of the Forest or other Department acquainted with that science deputed for a few months to Port Blair, he could identify many trees of the uses of which we are now ignorant, and classify all the woods and plants of the Andaman Forests; as it is, I have now 60 varieties of valuable timber verified and indexed by specimens. A fixed Saw Mill has been given to the Public Works Department at Port Blair: the present difficulty, however, is to get these magnificent trees of the Andamans, out of the forests to the mill: what we need are two or three travelling sawing machines; these could be pushed into the forests up to the very tree felled and required to be cut up, and railway sleepers and any scantlings almost could be sawn upon the spot, and easily carried out and shipped. With these appliances, Government would be very speedily and cheaply supplied in a variety of its timber requirements. The work, save for light pieces, is beyond the strength of elephants and coolies in such heavy jungle. I would undertake to cover the cost of the Engines in six months work of them.

T.

The Superintendent, Port Blair _____ _____ *Dr.*

To the amount of the under-mentioned Bills of M. J. Soobroy Moodellier for Stores purchased at Moulmein in the month of May 1865 :—

No. 206A, dated 27th June, 1867.

From—LIEUT. COLONEL, B. FORD, *Superintendent, Port Blair,*

To—*Secretary to Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 541, dated the 8th ultimo, requesting certain information, by direction of the Chief Commissioner, regarding the Stock Farm at Aberdeen.

2. In paragraph 2 of your letter, you desire me to explain what is done with the produce—milk, butter, young stock, &c., as also the terms on which cattle, pigs, &c., are made available for purchase, alive or slaughtered.

3. In reply, I beg to inform you that the milk produced of Settlement cows is sold, and the value credited in the Bunniah's Bill* for feed of cattle. As the milk is sold readily, no butter is produced; young stock is reared, and in the case of young pigs and lambs, is available for sale to Convict Live Stock keepers, and is occasionally also disposed of at fixed rates to private individuals at 4 annas per lb. Full grown stock is, as a rule, not sold, the herds and flocks not being as yet numerous enough to indent upon.

* *Vide* document C attached.

4. In reply to the 3rd paragraph of your communication, wherein you state that the milk required for the hospital at Aberdeen could be supplied by the Government Farm, and that you understand that the Commissariat have to procure milk elsewhere for the purpose, I beg to draw attention to Lieutenant Laughton's statement on this subject, as per margin.

"Convict hospitals are not supplied with any thing from the Commissariat. The hospitals of troops obtain their milk from that Department; and the balance is sold. This balance can be given over to Convict hospitals if desirable."

5. Akin to this subject you wish to know if the Commissariat Officer is prohibited grazing his cattle along the roads at Aberdeen. In reply thereto, I have also to request perusal of Lieutenant Laughton's statement on this subject, as per margin.

"The cattle were found to cut up the roads and eat young plants, &c., and have therefore been kept from going about on them as much as possible. The sheep go wherever they can find grazing, and the cattle are sent to the jungles."

6. In accordance with the concluding portion of the 3rd paragraph of your letter, I beg to attach herewith the required Statement in the form furnished by you, with enclosures† connected therewith. As no record whatever appears to have been kept until after my arrival here, as regards the Settlement Cattle Farm, the information that you require as to the date on which the Aberdeen Farm was commenced cannot be ascertained; indeed, I have never yet viewed the small breeding stock that I have endeavored to improve upon, as a farm, but rather as an experiment whereon, if successful, to establish a farm.

† Marked from A to I.

W.

No. 205, dated 25th June, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*

To—*Secretary to Chief Commissioner, British Burmah.*

The convict population on this Settlement having now increased to 7,131 men, I have the honor to state, for the Chief Commissioner's information, that the present supply of Copper Tokens is inadequate to meet the requirements of the Treasury Officer in the disbursement of their subsistence allowance at one time, which is always paid in Tokens, and as such Tokens are in currency here, they are often of use in making other payments when silver is scarce. I therefore respectfully solicit the Chief Commissioner will be pleased to move the Government of India, in the Home Department, to issue the necessary instructions to the Mint Master at Calcutta to strike off 10,000 Andaman Tokens and forward them to this Settlement as early as possible.

X.

No. 213, dated 3rd July, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*

To—*Secretary to Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 481 P. B., dated the 4th May, in which, by direction of the Chief Commissioner, you forward Extract, being copy of para. 12 of letter from the Financial Secretary No. 1542 of the 21st March last, on the

subject of the Budget Estimate for this Settlement for the current year, from which I note that the Estimate, as submitted to Government by the Accountant General, British Burmah, has been reduced by Rs. 1,66,644.

2. I observe that the Chief Commissioner has directed you to state that the establishment of an efficient check on the expenditure of the Settlement is a matter which has been long considered a desideratum, as now a grave responsibility is borne by the Superintendent, with reference to which I would beg to state that seeing to what a large extent this Settlement has now increased, I feel the time is now come when it will be far more satisfactory for myself and all concerned to have a fixed system of check, whereby each individual will know to what extent responsibility has to be borne by himself.

Referring to your remark that Commissariat stores of a miscellaneous nature increase expenditure to an alarming extent, which you consider in one way or another has to be borne by Government, and might be reduced, I beg to draw attention to the fact that has apparently been overlooked, that hitherto private individuals had to be provided for more or less, and heretofore many articles of clothing and household necessaries (which probably are the articles of luxury that you refer to) have been procured for their use. But these were necessaries that they could not get unless provided by the Commissariat. Convicts of a certain class have also been permitted to purchase to some extent, but whether issued in this way to convicts or free persons, these articles are paid for by them, so that the cost to Government on this account actually amounts only to the freight. As, however, expenditure appears to be on the increase, the supply of this description of articles shall be at once discontinued.

In the conclusion of your para. 1, you remark that the Indents are vague in form, and, in short, the system of expenditure requires revising. In assuring the Chief Commissioner of my desire to give my earnest attention to whatever may improve the existing system of indents and expenditure, and in undertaking that the whole of such system shall as far as possible, be revised as suggested, I would beg only to remark that the existing system is that which I took up from my predecessor, a system that had approval under the orders of Government. My responsibilities, I know, have been alarmingly heavy, but in view of those Government orders I felt that I had nothing for it but to carry out, and to do my best to give effect thereto.

2. In para. 2 of your letter you mention that the Chief Commissioner has no means of checking the expenditure of this Settlement, has no detail, nor vouchers, and that for this purpose it will therefore be necessary for him to keep an accurate record, as without this, similar items may be passed month by month without detection.

3. In your para. 3 you propose a method for supplying the above deficiency.

1*st*.—Vouchers are to be submitted in support of every entry in contingent bills.

2*nd*.—Registers giving details will be kept in the Chief Commissioner's Office, and vouchers filed.

3*rd*.—Fixed charges sanctioned by Government to be sent direct to Accountant General.

4. In your para. 4, as regards checks, you note that careful scrutiny of the Budget is the first and most necessary step,—its details being gone into before submission to Government. You remark that this has not been done in the case of Port Blair, and you instance that subsistence to convicts was doubled in the Estimate, and no sufficient necessity shown. You note that the miscellaneous charges, also those for Clothing, Medicines, and Marine, are, in your opinion, very heavy (I would here beg to remark, though my Budgets, as is supposed, have not been scrutinized, yet I beg to assure the Chief Commissioner that as far as my brief and unaided experience in the preparation of the Budget Estimate could enable me, I have given my best and earnest attention to the preparation of these very difficult, varied, and intricate documents).

5. In para. 5 I duly observe your remark that the supervision of the expenditure is not to cease with the submission of the Budget, for many items may be sanctioned which are not required; that these must not be purchased or charged for, and that care, therefore, must be taken to adhere to the plan proposed in your para. 3.

Having noted, as above, the main points of your paragraphs 2, 3, 4, and 5, regarding the system of checks proposed, and the instructions relative to supporting charges by proper vouchers,—also your proposal which I observe for the alteration of the term subsistence to convicts to "subsistence money," I beg to state, for the Chief Commissioner's information, that all these matters shall be carefully attended to, as far as this Settlement is concerned

Every endavour shall be made to reduce expenditure in all Departments, and to limit my Budget to its lowest possible dimensions.

Before leaving this portion of the subject of this letter, I would beg to remark on your proposal as to whether the details, Miscellaneous, Clothing, Medicines, and Marine, be checked by the Inspector General of Hospitals, Master Attendant, &c. I would beg to submit, for the Chief Commissioner's consideration, my humble opinion that this proposed system is open to some objection as regards the check, for instance, on cost of diet and clothing. It will be remembered that it was considered very unadvisable that the Inspector General of Prisons should have any thing to do with this Penal Settlement, and as far as that Officer was concerned, that my action here should be entirely independent of him. The course proposed would bring both the Superintendent and Medical Superintendent of Port Blair under the check of the Inspector General of Prisons of British Burmah. As regards medicines, it is urged that the Medical Superintendent of Port Blair, by his experience of this Settlement, should know best what is needed, and the same arrangement, for reasons that are obvious in both the above cases, applies equally to the check of the Master Attendant as to the Marine requirements of this Settlement. I would therefore respectfully submit to the Chief Commissioner that both myself and other Officers concerned would infinitely prefer to submit our Estimates to the Chief Commissioner's Office for check, rather than to Subordinate Officers. In the Chief Commissioner's Office such aid might be called in as might be considered fit for this check; but doubtless after a short experience there of the wants of this Settlement, such aid would not be required at all.

6. Turning to para 6 of your letter, there could be no objection, however, to the purchase of any stores not in stock, and required for the Settlement, the Medical or the Marine Department through the Commissariat, or the Heads of the Government Service Departments situated at the place of purchase.

7. There is a point that you note in para. 7 of your letter, which is, that you consider that the Commissariat Officer at Rangoon could supply the Settlement cheaper, if, say three months' notice were given him before articles are required. Having referred this matter to the Executive Commissariat Officer of this Settlement, and requested his careful consideration of the matter, he states, having in view that the stores obtained from Rangoon are few in quantity, and it being his opinion that Calcutta rates are, as a whole, lower than Rangoon rates, that he considers (and I agree with him therein) that it would be more advantageous to obtain the bulk of our stores from Calcutta, as otherwise the sheep which we *must* procure from thence would have to be sent down in empty vessels, and thus entail a double charge of freight. I beg to state that Lieutenant Laughton always gives from three to six months' notice for stores required from Calcutta, and I beg here to mention, for the Chief Commissioner's information, that the Commissariat Officer at Calcutta has already received our requisitions for our wants until 1st of October 1867. Bearing in mind your suggestion, I beg to state that in future the Commissariat Officer at Rangoon shall have full three months' notice for such things as may be required from him for the use of this Settlement.

8. The instructions given in the recapitulation which your para 8 contains have all been noted, and shall meet with every attention, with the exception of the clause relative to quarterly anticipatory indents, which is not understood, and would appear to be but a needless repetition of the Budget, which is hardly necessary. If, however, these are still considered requisite, further and detailed instructions with forms are requested.

With the enormous amount of work now devolving on my office, with the entire supervision of which I am, as it is, unremittingly occupied, I should be glad if these anticipatory documents could be dispensed with.

9. To meet the Chief Commissioner's wishes, as stated in para. 9 of your letter, I now submit a Revised Estimate for the current year, which has been prepared with great pains, and with every possible reduction. The estimate comprises—

1*st*.—Detailed Estimate of Establishments as per form.

2*nd*.—The requisitions of the Public Works Department, whose Estimate is incorporated with my own.

10. The Estimate for stores has been prepared as directed in your para. 10, and according to the form supplied, and is attached to the Revised Budget Estimate.

11. The new form of Indent, which you direct to be brought into use at once, whether in indenting on Calcutta, Rangoon, or on any of the Local Departments of this Settlement, has been introduced. *Vide* copy attached.

These Indents I notice, are to be made out in triplicate, one for the Issuing Officer, one for the Indenting Officer, and one for the Chief Commissioner's Office. These latter I have directed the Sub-Assistant Commissary General to forward monthly.

12. Paras. 12 and 13 of your letter, being forms for monthly returns of cash receipts and disbursements, shall be attended to.

13. Para, 14 of your letter directs that Indents and Returns of receipts and disbursements are to be introduced in arrears from the 1st of April, and to be submitted at once.

Returns of receipts and disbursements for April and May have already been forwarded to your address.

The Indents for April number no less than 256. If these are recalled, and made out in triplicate in the new form, no less than 768 fresh Indents will have to be written, and about the same number for May up to date. I hope, therefore, that it will be considered sufficient to embody the whole of these Indents into a few fresh Indents containing the whole of the issues under the several Heads; for instance all issues to Marine in one Indent in triplicate, all to Medical in another, &c. This, it would appear, will answer all purposes as well.

The new system could then be adopted from 1st of June next.

P. S.—The several Estimates of the Medical Department for medicines accompany the Budget. They are not priced, nor are they included in the General Budget, but will perhaps be priced by the Deputy Inspector General of Hospitals, British Burmah.

2. The Public Works Department, Military, and Police Estimates are not included in the General Budget now forwarded. They are budgeted separately in their several Departments.

NOTICE.

PORT BLAIR, *the 22nd May*, 1867.

1.—A new Form of Indent on the Commissariat Department having been introduced, notice is hereby given that no Stores will be issued from that Department on Indents of the old Form, after the 25th instant.

2.—All Indents are in future to be prepared in triplicate.

3.—Indents for Stores for *Government purposes only* will be countersigned by the *Superintendent*.

4.—All Indents for stores for *Bunniahs, Private persons and others*, on which *cash* is required to be prepaid, will be countersigned by the *Assistant Superintendent*.

5.—Stores will not be issued except on printed Indents, blank Forms of which can be obtained at the Commissariat Office.

6.—A form of Indent is given on the back of this Notice for general information.

(Sd.) B FORD, LIEUT. COLONEL,

Superintendent of Port Blair.

INDENT on the Commissariat Department, Port Blair, for stores required for the use of

ARTHUR F. LAUGHTON, *Lieut.,*
Sub-Assistant Commissary General.

Commissariat Office;
Port Blair,
The 1st July, 1867.

H.

Detailed Budget Estimate of Stores required for the Public Works Department for 1867-68.

[To be supplied through the Commissariat Department and incorporated in the Commissariat Budget.]

Unit of quantity or number.	Names of Articles.	Quantity received in 1866-67.	Quantity expended in 1866-67.	Probable quantity or number now indented for.	Estimated cost, including all charges.	How to be supplied.	Remarks.
					Rs. A. P.		
	Gunny Bags ... . No.	2,168	2,168	2,168	813 0 0	Monthly ..	The cost of these stores is included in the works sanctioned in the Budget of 1867-68. It is impossible to know the exact quantity of these stores that would be required; the third column, however, gives the quantity likely to be indented for as based on former experience.

Port Blair,
The 30th May, 1867.

ARTHUR F. LAUGHTON, *Lieut.*,
Sub-Assistant Commissary, General.

Y.

No. 271, dated 2nd July 1867.

From—LIEUTENANT ARTHUR F. LAUGHTON, *Sub-Assistant Commissary General, Port Blair,*
To—The Secretary to the Chief Commissioner, British Burmah, Rangoon.

I have the honor to inform you that, in accordance with your Memo. No. 357, dated 24th April, I had weighed in my presence certain articles to ascertain the wastage, and at the end of one month had them re-weighed. I attach a Memorandum of the result marked A.

2. I would observe that weighing one bag of each description of grain, &c., cannot be looked upon as a test of what wastage should be, for these bags were tolerably fresh taken from the top of other bags and set aside in a clear place where insects and vermin could not get at them, and where they are free from pressure and from being pulled about in rapid weighing; and issuing, as is necessary, when stores are issued to Bunncahs.

3. I have personally superintended the weighing out of a considerable quantity of provisions, making the entries in the register of wastage with my own hand. I beg to enclose a Memorandum of the result marked B.

MEMORANDUM marked A.

Articles.	When received	Original Weight	Weight on the 27th April 1867	Weight on the 27th May 1867

COMMISSARIAT OFFICE,
Port Blair, 1st July 1867.

ARTHUR F. LAUGHTON, *Lieut.*,
Sub-Assistant Commissary General.

Z.

No. 211, dated the 27th June, 1867.

From—LIEUT. COLONEL B. FORD, *Superintendent, Port Blair,*

To—*The Secretary to the Chief Commissioner, British Burmah.*

I have the honor to acknowledge the receipt of your letter No. 585 of the 15th ultimo, and with reference thereto beg to forward attached for the information of the Chief Commissioner a revised Statement of the Local (Miscellaneous) Funds' Transactions at this Settlement for the year 1866-67, in which the items both of Receipts and Expenditure are distinctly shown as desired.

2. I beg to explain again that the Imperial Accounts and other "Local Fund*" are rendered monthly to the Accountant General, British Burmah, and as the preparation of the same, with their voluminous vouchers, &c., for the year 1866-67 in my present almost total absence of Office Establishment would be a work of considerable labor and time, I beg the Chief Commissioner will be pleased, for the present at least, to forego their transmission; they can be hereafter prepared and forwarded if still required.

* Bazar, Ferry, Cattle, Market and Pound Fund. — A printed Account, published by order of the Chief Commissioner, British Burmah, of these Funds has just been received from the Accountant General, British Burmah.

3. With reference to the concluding portion of your letter under reply, I have the honor to state, that saving the Account now furnished, no Statement of any separate or other source of Revenue, such as "Miscellaneous Fund Account," is kept in this Treasury; all Account involving every item of the kind being rendered and included in the Imperial Account forwarded monthly to the Accountant General, British Burmah.

RETURN showing miscellaneous Receipts and Disbursements of every description
